HASPA Group

History

The Hamburger Sparcasse was founded in 1827 by Amandus Abendroth in the legal form of a "legal entity under old Hamburg law". In 2003, banking operations were transferred to the newly founded subsidiary "Hamburger Sparkasse AG", while the original Hamburger Sparkasse was renamed HASPA Finanzholding. HASPA Finanzholding is now the only company that is still legally registered as a 'legal entity under old Hamburg law', and it owns itself.

HASPA Finanzholding

Legal entity under old Hamburg law („juristische Person alten hamburgischen Rechts“)

No public or private owners; profits remain in the group

Supervised by ECB

Statutory mandate is enshrined in the articles of association

Haspa AG

One of six independent savings banks – affiliated with the DSGV and the institutional protection scheme via the HSGV

Largest company in the group – operates banking and issuing business

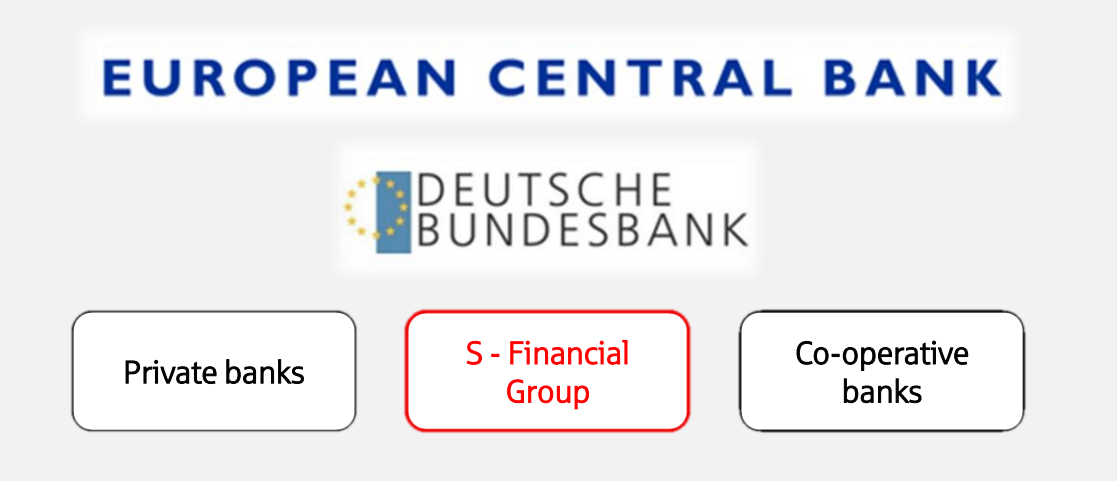

Control and profit transfer agreement with the holding company

Institutional protection Scheme of the S-Finance Group

Protection of deposits beyond the statutory deposit guarantee

The aim is to secure the liquidity and solvency of the member institutions

The Savings Banks Finance Group in the German banking system

Europe's largest banking group with ~500 members

338 savings banks (balance sheet total: € 1,539 bn)

5 Landesbank groups (balance sheet total: € 973 bn)

Universal credit institutions with a public mandate

Comprehensive range of banking services for all customer groups, in particular private households and SMEs

Regional principle: local commitment to economic development and the common good

Protection system of the Savings Banks Finance Group

Eleven regional savings bank support funds of the regional associations

Security reserve of the Landesbanken and giro centres

Guarantee fund of the Landesbausparkassen

New additional fund since 2025

Objective of voluntary institutional protection

Continued existence of the member institutions by guaranteeing liquidity and solvency

Continuation of the institutions' contractual business relationships with their customers

Statutory deposit protection

In addition to the institutional guarantee, compensation from depositors via the statutory deposit guarantee scheme

Protection of customer deposits up to an amount of from € 100,000

Customer segments and statutory mandate

Market leader across all segments in the region

Statutory mandate:

Haspa "*provides in particular the opportunity to invest savings and other funds securely and at interest, promotes savings and capital formation among broad sections of the population and serves to satisfy the credit needs of the local economy, with a particular focus on small and medium-sized enterprises*."

Private customers

- ~50% of Hamburg residents are Haspa customer
- No. 1 mortgage lender in Hamburg
- 1.5 mn current accounts and 100 neighbour-hood branches in and around Hamburg
- Most successful value-added banking product in Europe with 813,000 accounts
- Granular and stable deposit base
- Brokering consumer loans to the S-Kreditpartner since 2018

Private Banking

- Around € 19.4 bn in assets under management
- Continuous analysis and optimisation of large assets by in-house experts
- Advice in all areas of life from generational, foundation and property management to private banking for entrepreneurs
- Awarded for the 23nd time in a row as "Best asset manager in the German-speaking region"

Corporate clients

- ~50% of Hamburg‘s SME are Haspa customer
- Leading SME bank with around 60,000 corporate clients
- Market leader in business start-up financing
- Central competence centres for: Real estate, industry/production, trade, harbour/logistics, medical professions, healthcare & services, energy and environment

Earnings figures

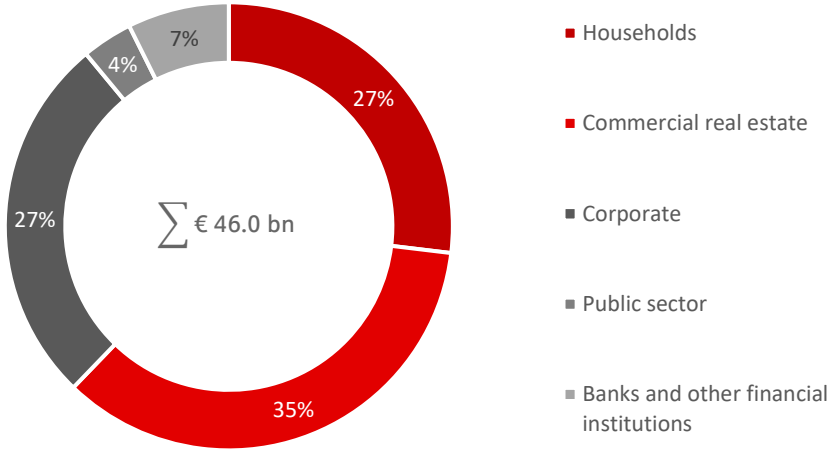

CIR and ROE with significant improvement

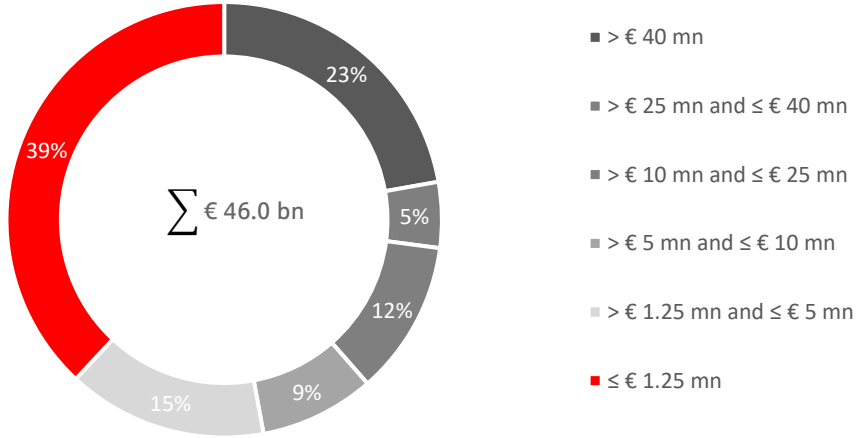

- Increase of net interest and commission income
- Lower expenses from pension provisions. As of December 31, 2025, a large part of the pension obligations—amounting to €900 million—had been transferred to a pension fund
- Steady strengthening of provision reserves from annual earnings

Loan portfolio (I)

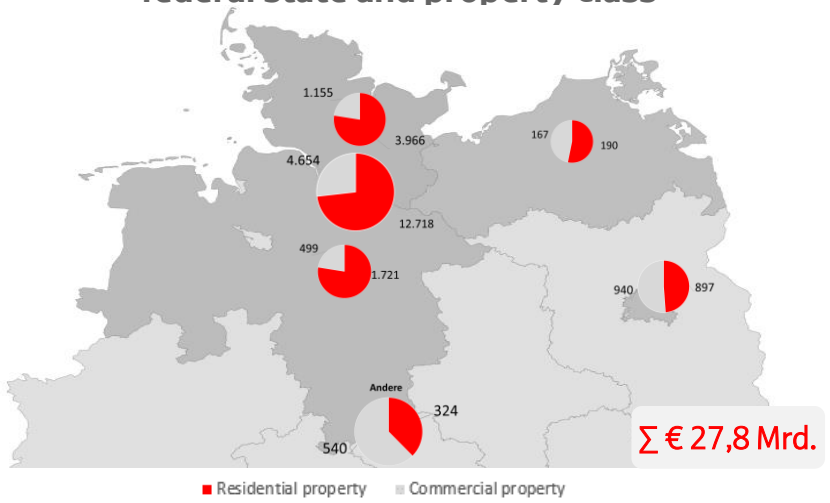

Loan Portfolio

Distribution of expusure

Real estate loans: Distribution of exposure in € mn by federal state and property class

2025: €6.3 billion (+€1 billion) in new loans granted

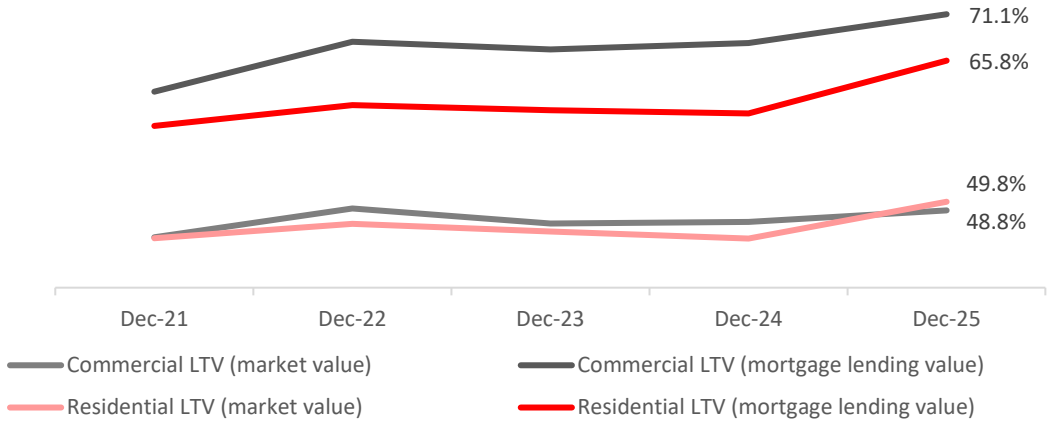

Regional loan book with 100% exposure to Germany

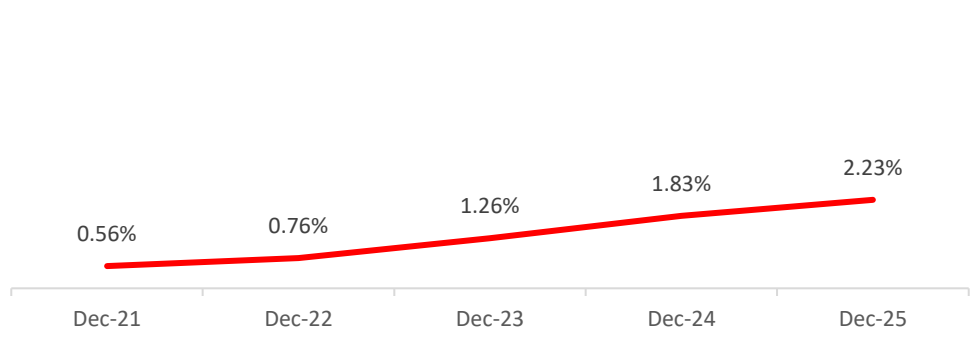

- Loan portfolio reflects conservative risk profile
  - Predominantly fixed-interest loan portfolio (>80%)
  - Loans to privat households >90% residential mortgages
  - Consumer loans: brokering to the S-Kreditpartner since 2018

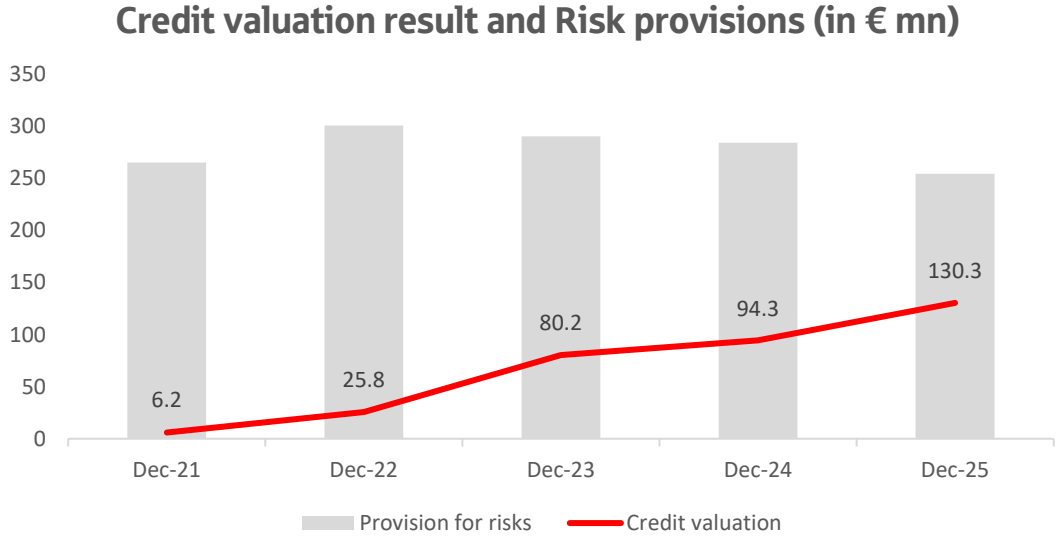

Real estate financing with a focus on residential properties

- >70% residential use of mortgage portfolio
- CRE portfolio with a focus on multi-family dwellings

Loan portfolio (II)

Comfortable LTV ratios based on both market and mortgage lending values

- Conservative lending standards - e.g. high initial repayment rates

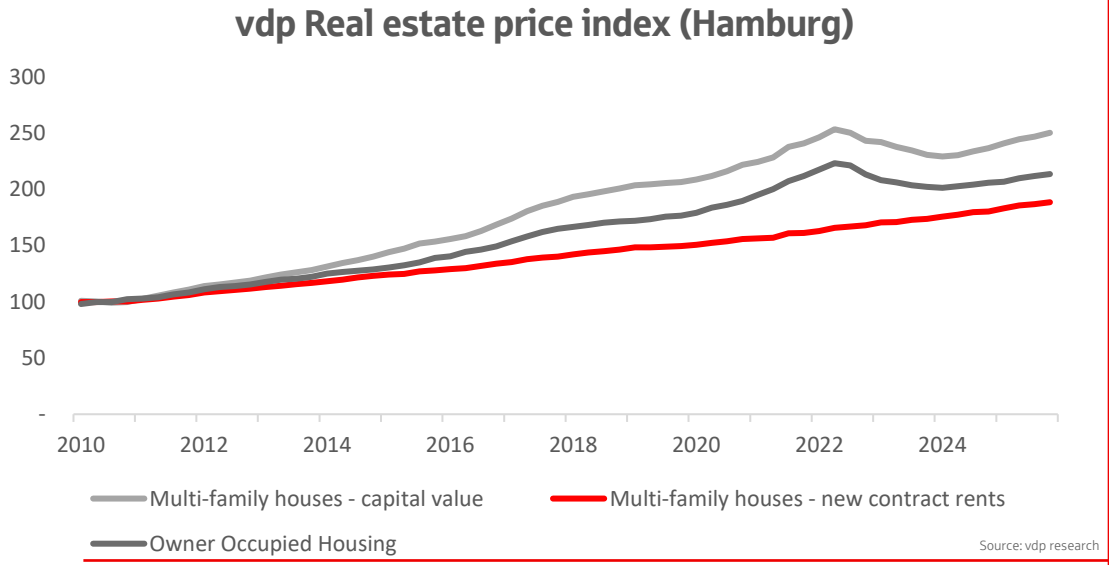

NPL ratio at a low level

- Continuous adjustment of lending standards to market conditions

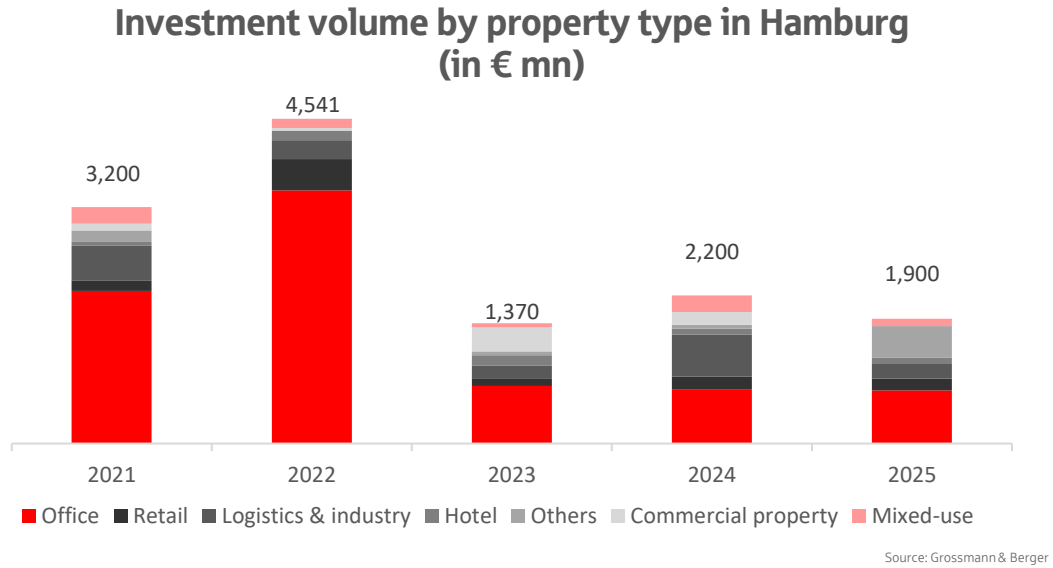

High amount of risk provisioning available

- Provisions in the lending business are at expected levels. The valuation result includes additional provisions in the form of lump-sum write-downs

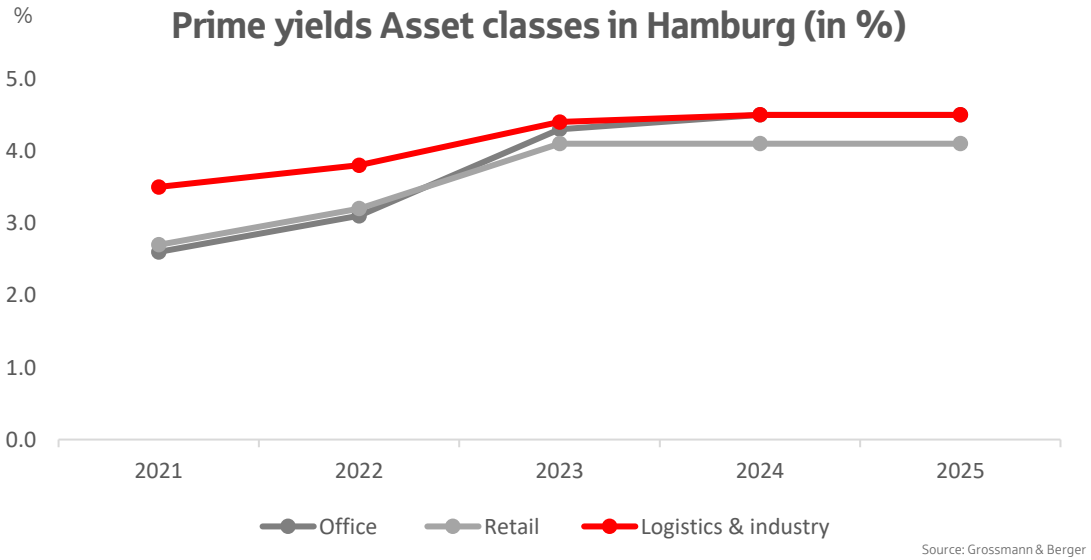

Hamburg property market

Source: vdp research

Source: Grossmann & Berger

Source: Grossmann & Berger

Rental property market in Hamburg

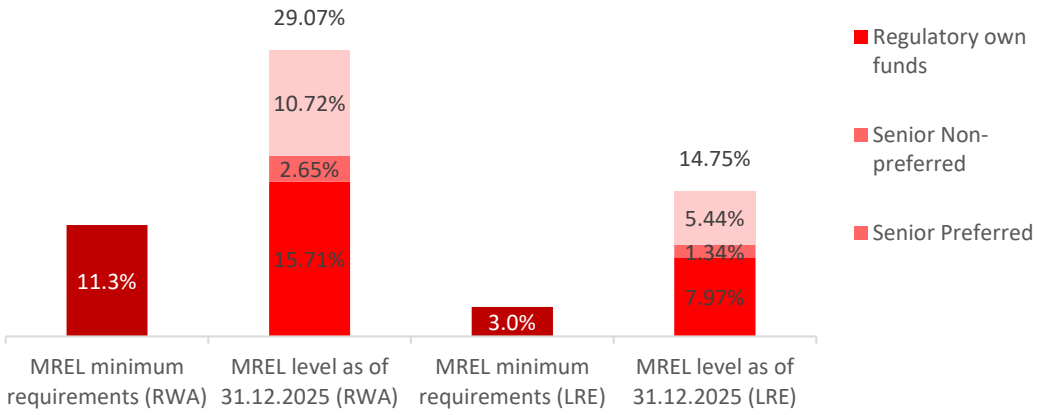

- Rising new contract rents and continued high demand in the face of a short supply of housing are leading to moderate price increases compared to 2024.
- Vacancy rate at < 1,0%

Investment market in Hamburg

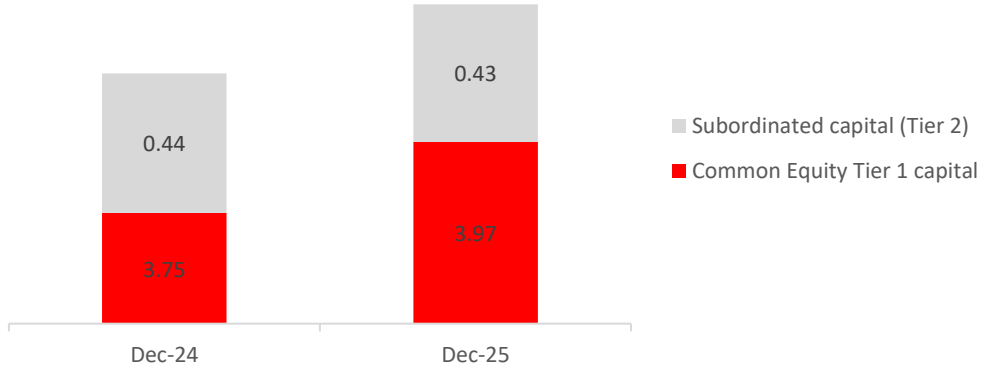

- Prime yields remain stable
- The transaction volume remained below the long-term average. In 2025, Hamburg ranked third among top 7 cities after Berlin and Munich.
- The vacancy rate for office buildings stands at 6.3 %, below the national average

MREL requirements and Leverage Ratio

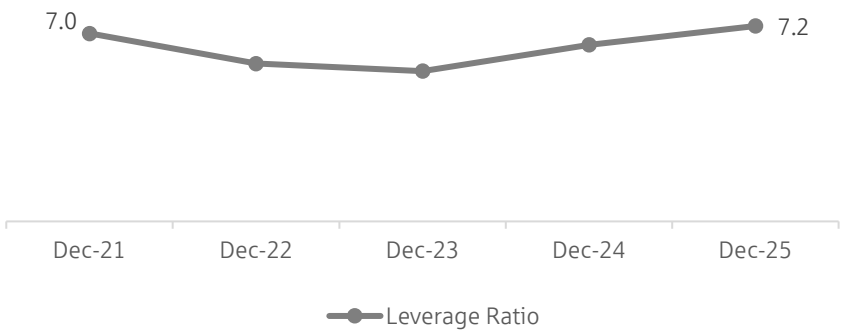

MREL Minimum Requirements & Level

Composition of equity (in € bn)

Leverage Ratio (in %)

Mrel panning includes higher minimum requirements from mid-2026

Current MREL minimum requirements per current MREL decision

- 8.00% plus combined capital buffer requirement of around 3.33% in relation to risk-weighted assets (RWA)
- 3.00% in relation to the total exposure measure (LRE)

MREL portfolio as of the reporting date 30.06.2025 significantly above the current MREL minimum requirements

- 29.07% in relation to RWA
- 14.75% in relation to the LRE

3. Haspa ESG-Bonds

Sustainability

Strategic goal: Enabling the transformation of Hamburg‘s metropolitan region

Sustainability firmly anchored in the public-interest orientated business model

Haspa has seen itself as a sustainable company since it was founded in 1827. *The savings bank concept is based on social and economic sustainability*: financial provision should prevent poverty and enable all population groups to lead a good, self-determined life. Promoting the common good has always been more important to us as a savings bank than the pursuit of short-term profit. *This means that we are committed to a climate-friendly, resource-conserving and socially balanced economy and way of life and that we think and act in a long-term, responsible and intergenerational manner.*

Environment

- Active support for the Hamburg Climate Plan
- S-transformation loan: financing of sustainable projects with favourable conditions
- S-ESG score: advice for companies based on their individual sustainability risks
- Development of decarbonisation directive
- CO2-optimised business operations

Social

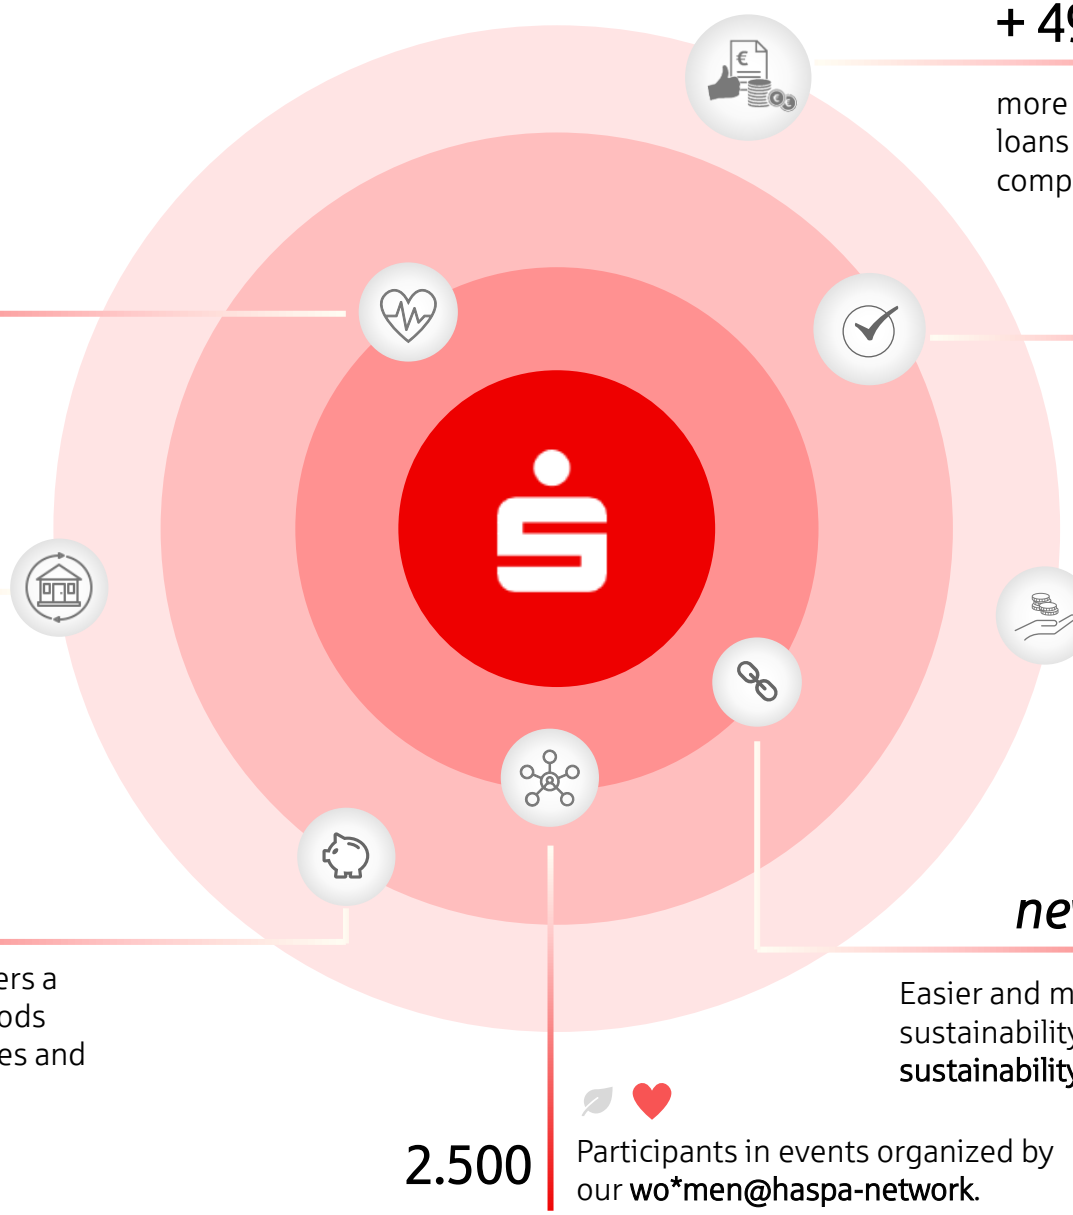

- One of the largest employers and apprenticing company in Hamburg with its own trainee flats
- Regional promotion in the areas of education and social affairs, environmental and climate protection, art, music and sport
- Encouraging donations: 360 foundations under the umbrella of the Haspa Hamburg Foundation
- Financial inclusion by offering basic current accounts for all people, regardless of their personal situation

Governance

- German savings banks' voluntary commitment to climate-friendly and sustainable business practices (commitment to UN SDGs and the Paris Climate Agreement); Net Zero until 2045
- Orientation towards UN Global Compact
- Exclusion criteria and sustainable financing standards for the depot A and core business
- Orientation towards the fundamental labour standards of the International Labour Organization (ILO)

Haspa sustainability highlights 2025

Selected milestones on the path to a more livable and resilient Hamburg.

+ 49 %

Overview of the Green Bond Framework

The Green Bond Principles 2025 version

By issuing Green Bonds, Haspa wants to enable investors to support its goal of providing funding for the sustainable transformation of Hamburg and its metropolitan region.

Use of proceeds

- Exclusively for the refinancing of eligible loans with a sustainable purpose
- Strong focus on the Hamburg metropolitan region

Project selection process

- Management by internal Sustainable Finance Committee
- Multi-stage selection process:
  - Regular credit process
  - ESG risk management
  - Green bond eligibility criteria
- Continuous review and monitoring of assets in the portfolio

Management of proceeds

- Portfolio-based management with full allocation of proceeds to the green finance portfolio
- Ensuring that Green Bonds are always covered by eligible green assets

Reporting

- Annual publication of an allocation and impact reporting
- Detailed breakdown of the use of funds by green project category

Ratings

	Moody's		FitchRatings	Morningstar DBRS	Moody's
	Haspa AG		**S-Finance Group**		
Mortgage Pfandbriefe	Aaa				
Public Pfandbriefe	Aaa				
Senior Preferred / LT Issuer Rating	Aa2	negative	A+	A (high)	Aa2
Senior Non Preferred	A3				
Adjusted BCA	a2				a2
Current liabilities	P-1		F+1	R-1 (middle)	

Latest rating actions:

April 2026: Moody's affirms issuer rating of Haspa at „Aa2" and revises the outlook from „stable" to „negative" in light of recent regulatory developments. The change in outlook reflects amendments to the EU Single Resolution Mechanism Verordnung (SRM-VO), the Bank Recovery and Resolution Directive (BRRD) and the Deposit Guarantee Schemes Directive (DSGD), which entail a revision and further harmonisation of bank's liability waterfall. As a consequence, deposits are expected to rank more favourable within the liability structure than senior preffered debt instruments.

March 2025: Moody's affirms Haspa's issuer rating of "Aa2" with a "stable" outlook.

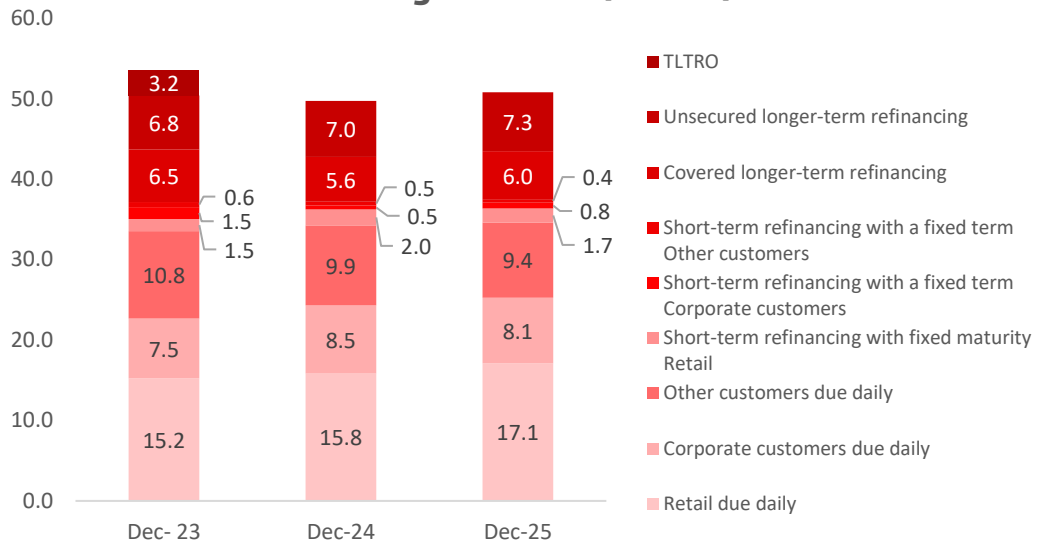

December 2024: Moody's upgrades Haspa's issuer rating to "Aa2" with a "stable" outlook. The good ratings confirm Haspa's high creditworthiness and solidity. The basis for Moody's rating decision is, among other things, Haspa's good capitalisation and its robust business model, which is characterised by a conservative, stable investment policy on the one hand and a strong deposit base, particularly among retail customers, on the other. In addition, being part of the S-Finance Group has a positive effect.

March 2024: Moody's confirms the rating of Aa3 and raises the outlook from "stable" to "positive".

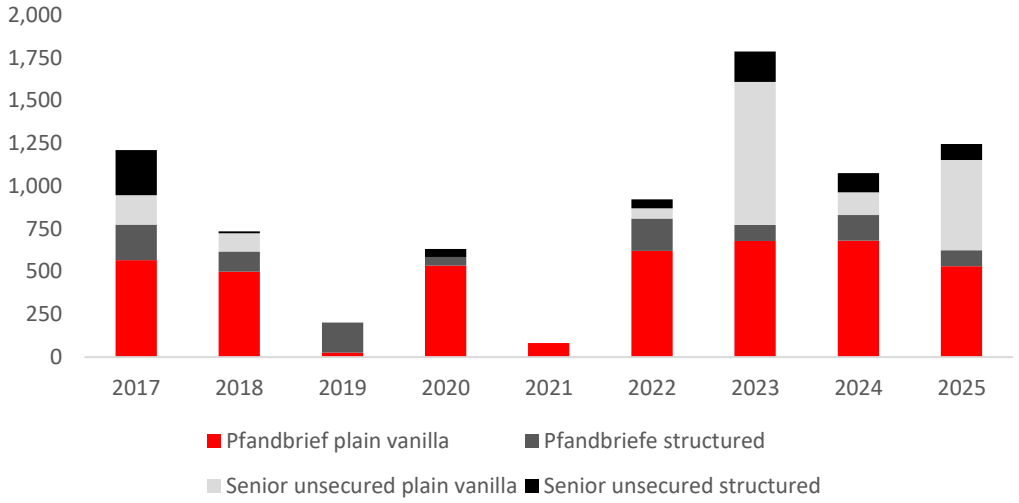

April 2023: The rating agency Moody's awards Haspa an issuer rating of Aa3 for the first time.

5. Appendix

Mortgage Pfandbrief: Mortgage Lending Value

A central and conservative national valuation concept in real estate valuation

- The German Pfandbrief Act distinguishes between the market value and the mortgage lending value of a property.
- The mortgage lending value is based on the long-term and sustainable characteristics of the property to be valued and excludes speculative elements and fluctuations in value due to economic factors.
- A maximum of 60% of the mortgage lending value of a property may be used to cover a mortgage Pfandbrief.
- In international comparison, most legal systems are based on the market value.
- The Pfandbrief is particularly conservative with the mortgage lending value approach.

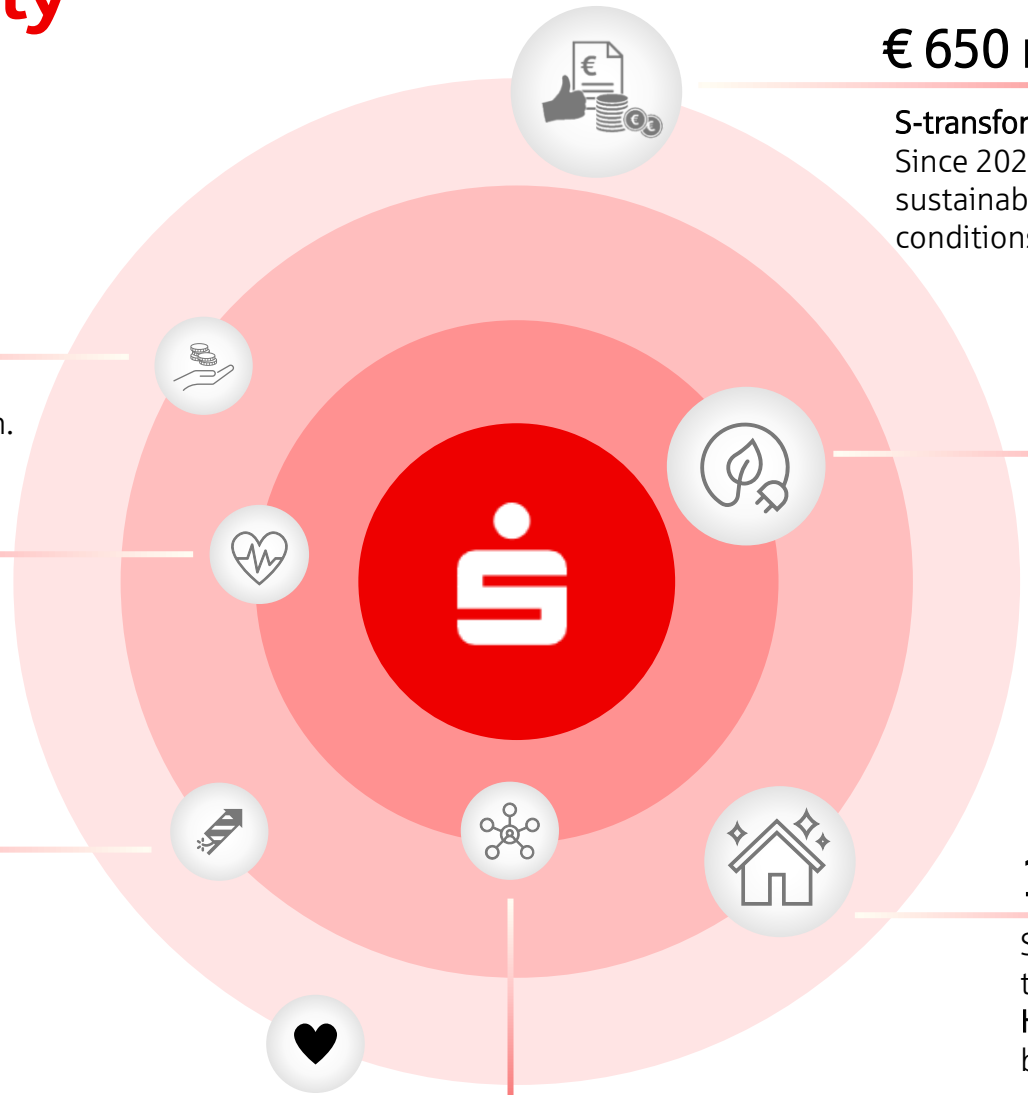

Conservative valuation of real estate

- The mortgage lending value (MLV) is determined according to detailed statutory provisions
- Based on permanent features of the property
- Market value is the upper limit for the MLV
- Occasion-related review of the MLV
- Claims up to 60 % of the MLV are eligible as cover

2024 – Calculation of ESG scenarios within the framework of capital planning

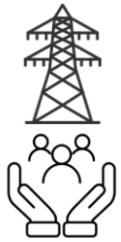

2024 – Expansion of the ESG product range
including S-Transformation Loan, Renovation Pilot, Social and Green Bonds, etc.

2024 – Establishment of strategic and sales ESG departments

Affordable basic infrastructure: public electricity grids

Public electricity grids as affordable basic infrastructure in accordance with ICMA Social Bond Principles

Haspa's assessment

Basic Service: No urban life is possible without electricity grids. Access to electricity forms the basis for living, working, public transport and healthcare.

Orientation towards the common good: As a municipal company, Stromnetz Hamburg GmbH is not profit-orientated, but concentrates on fulfilling its tasks in a cost-efficient manner to ensure affordability.

By combining a focus on the common good and the aspect of basic services, the electricity grid contributes to the ICMA Social Bond Principle category "Affordable basic infrastructure".

The Social Bond Principles

Social Project categories include, but are not limited to, providing and/or promoting:

- Affordable basic infrastructure (e.g. clean drinking water, sewers, sanitation, transport, energy)

The electricity grid in Hamburg

Referendum: Buyback of the energy grids by the City of Hamburg in 2013
The repurchase of the electricity grids by the City of Hamburg was initiated by the citizens in a referendum with the aim of a supply orientated towards the common good.

Target vison: Stromnetz Hamburg GmbH
Overall goal I: Secure, cost-effective, consumer-friendly, efficient and environmentally friendly operation of Hamburg's electricity distribution grid.*

Framework conditions for equity investments by the City of Hamburg
"In contrast to privately owned companies, the focus of the FHH's shareholdings is therefore not on making a profit, but on performing the specified task as cost-effectively as possible. The core of Hamburg's public companies with a shareholding of over 50% secures the city's infrastructure and provides the population with services that would not be offered in the desired form by the private sector. A political objective must therefore be formulated for each direct company participation of the FHH."
