4 Remuneration Report

258 **Introduction**

258 **Remuneration of the Board of Management**
258 Business performance and target achievement in financial year 2025
258 Composition of the Board of Management
259 Consideration of the resolution of the Annual General Meeting 2025
259 Board of Management remuneration systems
267 Board of Management Remuneration System 2020
269 Further remuneration and contractual provisions
269 Contract termination provisions
270 Target remuneration of Board of Management members serving in financial year 2025
271 Performance criteria for the variable remuneration
274 Information on remuneration awarded and due to Board of Management members serving in financial year 2025 and former members in accordance with Section 162 AktG
277 Information on shares granted in the financial year
277 Compliance with maximum remuneration

278 **Remuneration of the Supervisory Board**

280 **Changes in earnings and remuneration over time**

282 **Report of the Independent Auditor**

Introduction

The remuneration report of Brenntag SE was prepared jointly by the company's Board of Management and the Supervisory Board and reports on the remuneration awarded and due to the current and former members of the Board of Management and the Supervisory Board in financial year 2025.

The remuneration report is intended to comply with the regulatory requirements of Section 162 of the German Stock Corporation Act (AktG) and the recommendations and suggestions of the German Corporate Governance Code (GCGC) as amended on April 28, 2022.

The remuneration report has been audited by Deloitte GmbH Wirtschaftsprüfungsgesellschaft. This audit went beyond the requirements of Section 162, para. 3 of the German Stock Corporation Act (AktG). The Report of the Independent Auditor is attached to the remuneration report.

Remuneration of the Board of Management

Business performance and target achievement in financial year 2025

In a general market environment marked by a high degree of economic uncertainty, the financial results for financial year 2025 remain below the company's own targets. The Brenntag Group's profit after tax fell by 50.4% to EUR 269.7 million, compared with the previous year's figure of EUR 543.7 million.

The payout amount of the annual bonus under the Remuneration System 2023, which is based on the philosophy of "Pay for Performance", reflects this development. For financial year 2025, the average annual bonus for the members of the Board of Management is 0% of the target amount, reflecting the Brenntag Group's results, which were below expectations.

2025 also marked the end of the performance period for the third tranche of the long-term variable remuneration under the Remuneration System 2020. A total payout amount of 0% of the target amount was reached over the four-year performance period. This is based on measurement of the relative shareholder return and the change in the share price, which reflects the change in shareholder return between 2022 and 2025, both in absolute terms and in comparison to relevant global competitors and the German stock market. Further details are to be found in the section "Performance criteria for the variable remuneration".

Composition of the Board of Management

At the end of financial year 2025, the Board of Management of Brenntag SE consisted of two members: Jens Birgersson (CEO Brenntag Group) and Thomas Reisten (CFO Brenntag Group).

Jens Birgersson was appointed as the new Chief Executive Officer and member of the Board of Management with effect from September 1, 2025. Dr. Christian Kohlpaintner stepped down as CEO on August 31, 2025. His service agreement ended on December 31, 2025.

Thomas Reisten was appointed to the Board of Management with effect from April 1, 2025. His service agreement already came into effect on March 1, 2025. He assumed responsibility as Chief Financial Officer, succeeding Dr. Kristin Neumann, who left the Board of Management on March 31, 2025.

Ewout van Jarwaarde left the Board of Management by mutual agreement with effect from September 8, 2025. His service agreement, which was originally due to run until December 31, 2028, will now end on March 31, 2026.

Michael Friede stepped down from the Board of Management by mutual agreement with effect from November 30, 2025. His service agreement, which was originally due to run until March 31, 2026, was terminated by mutual agreement on the same date.

Consideration of the resolution of the Annual General Meeting 2025

The remuneration report of Brenntag SE for financial year 2024 was approved by the Annual General Meeting on May 22, 2025 with a 97.03% share of the votes cast.

During preparation of the remuneration report, feedback from investors and proxy advisors received in connection with the approval of the previous year's remuneration report is taken into account, where available.

Board of Management remuneration systems

The Supervisory Board is responsible for determining the remuneration of the Board of Management members. The Nomination and Remuneration Committee of the Supervisory Board discusses and reviews the remuneration system for the Board of Management at regular intervals and prepares resolutions on any changes thereto. In its decisions on the setting of the remuneration system, the Supervisory Board takes into account the remuneration and employment conditions of the employees of Brenntag SE, in particular the senior managers.

In setting the remuneration, the Supervisory Board pays attention to an appropriate relationship between the tasks and performance of the Board of Management members and the situation of the company. In order to assess the appropriateness of the remuneration system and the individual remuneration of the members of the Board of Management, the Supervisory Board conducts a horizontal review of the remuneration levels and structure. Horizontal benchmarking is performed with companies of comparable size at national level. In 2025, the Supervisory Board referred to a remuneration study conducted by an independent remuneration consultancy when carrying out the horizontal review of the remuneration levels of Jens Birgersson and Thomas Reisten. In addition to Brenntag, 28 DAX companies, four MDAX companies, one SDAX company and one unlisted company of comparable size were surveyed in this study, which was conducted in 2024. The companies included in the comparison were: adidas, Allianz, BASF, Bayer, Beiersdorf, Commerzbank, Continental, Covestro, Daimler Truck, Deutsche Bank, Deutsche Börse, Deutsche Lufthansa, Deutsche Post, Deutsche Telekom, E.ON, Evonik, Fresenius, Fresenius Medical Care, Heidelberg Materials, Henkel, Infineon, Lanxess, Mercedes-Benz, Merck, Metro, Munich Re, Porsche Automobil Holding, RWE, SAP, Siemens, Siemens Energy, Siemens Healthineers, thyssenkrupp, Volkswagen and ZF Friedrichshafen. As Brenntag was in the 17th percentile of the peer group based on the size criteria used in the study, the 17th percentile was used as the benchmark for the horizontal review.

The Board of Management remuneration systems, in particular the Board of Management remuneration system that was introduced in 2023, are designed to be in line with the German Corporate Governance Code in the version of April 28, 2022 and the requirements of the amended German Stock Corporation Act. These systems are designed to be clear and comprehensible and support the Group's long-term performance by creating effective incentives for growth and increasing profitability. The aim of the remuneration systems is to create an incentive for successful and sustainable corporate development. The systems are therefore geared to transparent, performance-based remuneration that is strongly focused on the company's success and that depends, in particular, on long-term, but also operational targets, the performance of the Brenntag share price as well as sustainability targets.

Two different remuneration systems were applied in 2025. The Board of Management Remuneration System 2023 was resolved by the Supervisory Board on April 18, 2023 and approved by 94.11% of the votes cast at the Annual General Meeting on June 15, 2023. The Remuneration System 2023 applies to all Board of Management members of Brenntag SE currently in office and to all members of the Board of Management serving in financial year 2025. The Board of Management Remuneration System 2020 was adopted by the Supervisory Board on December 23, 2020 and approved by 91.62% of the votes cast at the Annual General Meeting on June 10, 2021. The Remuneration System 2020 applies to the tranches of long-term variable remuneration granted under its framework.

The annual base salary and the variable remuneration components are shown separately in the following. There then follows a description of benefits in kind and other contractual provisions that are structured in a comparable manner in both remuneration systems.

Fixed remuneration	▪ Base salary ▪ Benefits in kind ▪ Pension allowance
Short-term variable remuneration	▪ **Plan type:** Target bonus model ▪ **Financial performance criteria:** – 60% organic operating EBITA – 20% working capital turnover – 20% earnings per share – Individual performance multiplier (0.8–1.2) ▪ **Cap:** max. 200% of the target amount
Long-term variable remuneration	▪ **Plan type:** Virtual Performance Share Plan ▪ **Performance period:** Four years ▪ **Financial performance criteria:** – 70% percentile ranking of the total shareholder return (TSR) of the Brenntag share vs. peer group of global competitors – 30% ROCE – ESG multiplier (0.8–1.2) ▪ **Cap:** max. 250% of the target amount
Other remuneration components and contractual provisions	▪ **Malus & Clawback:** The Supervisory Board is contractually entitled – to retain variable remuneration (malus) – to reclaim variable remuneration (clawback) ▪ **Share Ownership Guideline** in the amount of the annual base salary: – Chair of the Board of Management: 200% – Other members of the Board of Management: 100% ▪ **Maximum remuneration** pursuant to the German Stock Corporation Act – Chair of the Board of Management: EUR 7,500,000 – Other members of the Board of Management: EUR 5,000,000

4.01 Remuneration components – Remuneration System 2023

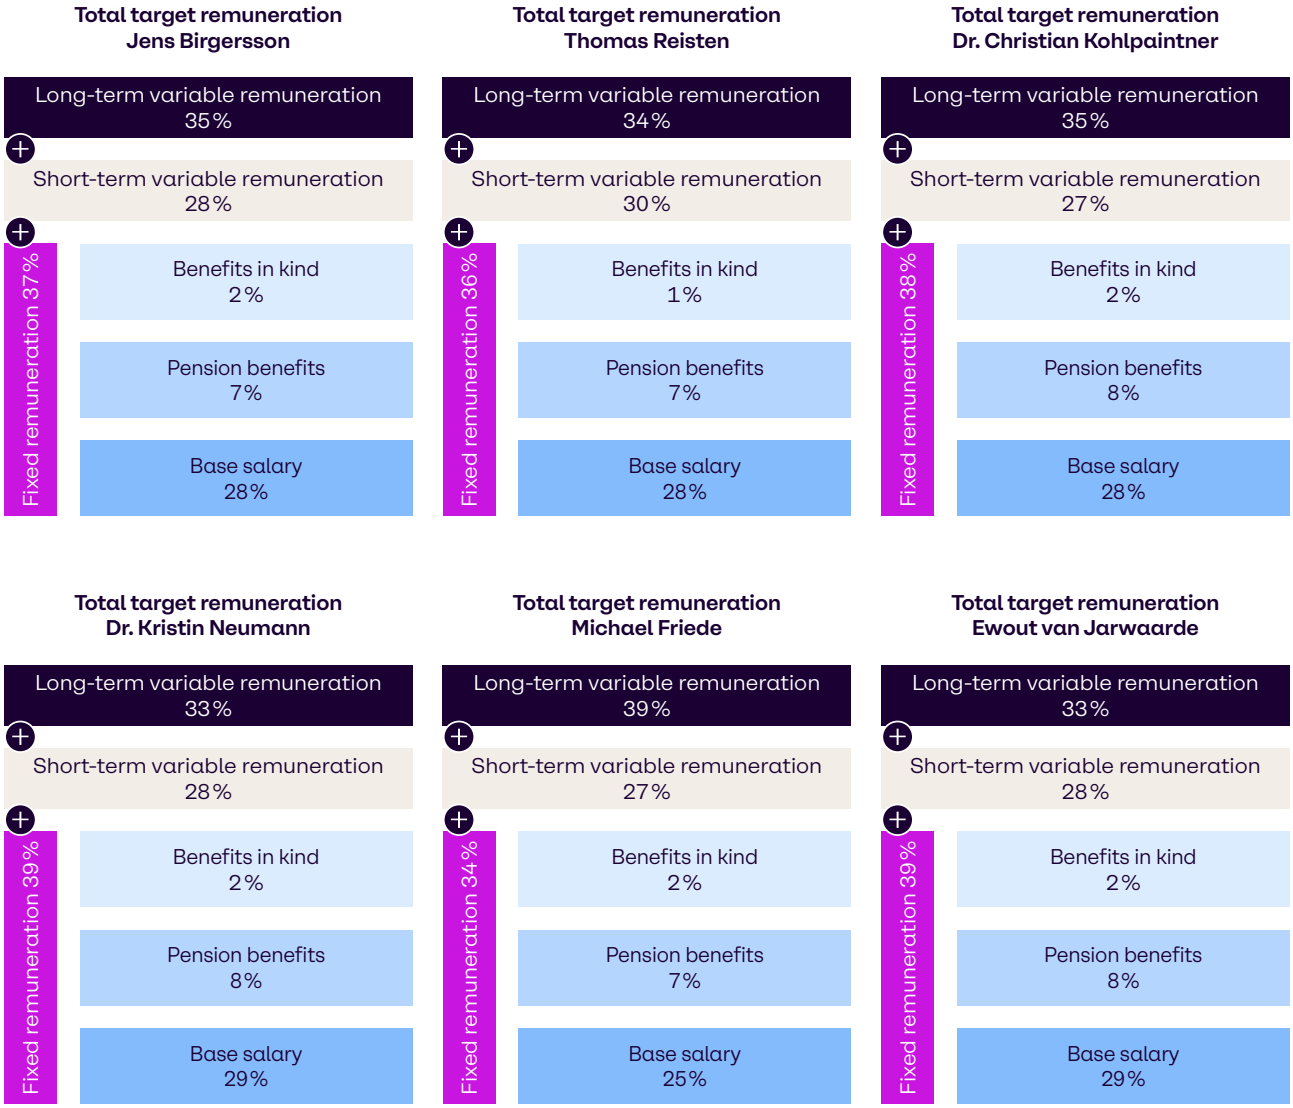

Board of Management Remuneration System 2023

The Board of Management Remuneration System 2023 applies to the following current and former Board of Management members in 2025: Jens Birgersson, Thomas Reisten, Dr. Christian Kohlpaintner, Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde.

In connection with the appointment of the CEO, a one-off sign-up bonus was granted in the first financial year instead of the short-term variable remuneration provided for under the Remuneration System 2023. This is a departure from the standard treatment of individual remuneration components, which was necessary to ensure competitive total remuneration in order to secure the appointment of the Board of Management member.

All other components are applied exactly within the framework of the Board of Management remuneration system adopted by the Supervisory Board and approved by the Annual General Meeting 2023.

The remuneration comprises fixed remuneration and variable remuneration. The fixed remuneration consists of a base salary, pension allowance and benefits in kind. The variable remuneration is made up of short-term and long-term variable remuneration components. Of the target total remuneration of the Board of Management members, fixed remuneration accounts for between 34% and 39%, short-term variable remuneration components for between 27% and 30% and long-term variable remuneration components for between 33% and 39%.

4.02 Remuneration structure – Remuneration System 2023

In addition to the above-mentioned remuneration components, the Board of Management members receive benefits in kind under their service agreements, such as a mobility allowance, accident insurance cover, and benefits for health care and long-term care insurance.

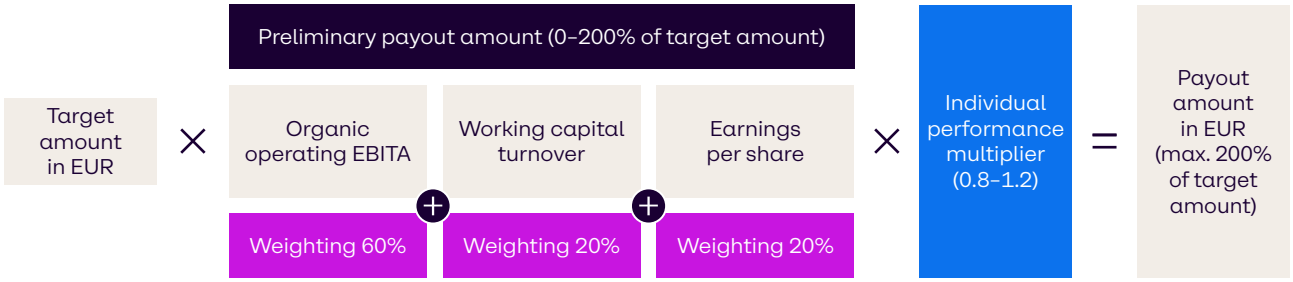

The annual base salary is paid in twelve equal instalments at the end of each month. If the service agreement begins or ends during a financial year, the annual base salary for that financial year is payable on a pro rata temporis basis.

The variable remuneration consists of two components that support the performance of the Group by creating effective incentives for growth and increased profitability to ensure the successful and sustainable development of the company: short-term variable remuneration in the form of an annual bonus payment (annual bonus) and long-term variable remuneration in the form of virtual shares (performance share plan). The annual bonus provides an incentive to achieve the operational business objectives of the financial year, which in turn are derived from the business strategy and the annual budget plans. The performance share plan provides an incentive to ensure the long-term performance of the company.

Annual bonus under the Remuneration System 2023

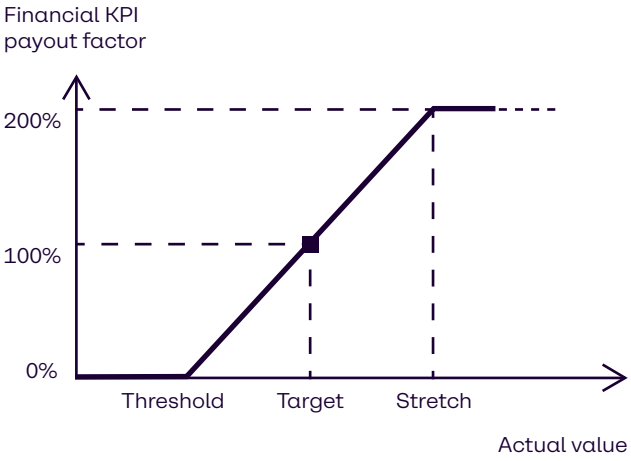

The annual bonus depends both on Brenntag's overall performance and on the specific responsibilities and challenges of the Board of Management members. It is determined based on the achievement of certain targets set for the financial year, which include organic operating EBITA, working capital turnover and earnings per share.

In 2025, the targets set for working capital turnover and earnings per share relate to Group level for all members of the Board of Management. For Thomas Reisten, Dr. Christian Kohlpaintner and Dr. Kristin Neumann, the target for organic operating EBITA related to Group level. For Michael Friede and Ewout van Jarwaarde, 75% of the target for organic operating EBITA related to Group level and the remaining 25% to divisional level in order to align the targets with their particular divisional responsibilities.

4.03 Structure of the annual bonus – Remuneration System 2023

Organic operating EBITA is the key performance indicator for the implementation of Brenntag's strategy. It can take into account different depreciation profiles and enable the differentiated strategic steering of Brenntag's divisions; this KPI is weighted at 60% in the bonus calculation. Working capital turnover is a key performance indicator for Brenntag to ensure efficient deployment of capital; the weighting is 20%. Earnings per share, as a parameter for measuring Brenntag's shareholder value, is also weighted at 20%. The payout factor for each key performance indicator lies within a range of 0% to 200%. Target, threshold and stretch values for the three key performance indicators are derived from the annual budget plans and are set annually by the Supervisory Board. If the defined target value for each performance criterion is achieved, this results in a payout factor of 100%. If the actual value for each performance criterion is equal to or below the threshold, this results in a payout factor of 0%. If the actual value for each performance criterion is equal to or above the stretch, this results in a maximum payout factor of 200%. If the actual values are between the respective target and threshold values or between the respective target and stretch values, the payout factor is determined by linear interpolation. The following is an example of a payout factor curve which is defined for each financial performance criterion:

4.04 Annual bonus payout factor curve – Remuneration System 2023

The overall payout factor is calculated by multiplying the payout factors of the three performance criteria by their respective weightings and then adding together these three weighted payout factors.

In order to determine the final payout amount, the overall payout factor is multiplied by the individual performance multiplier and by the target amount. The individual performance multiplier is set by the Supervisory Board after each financial year in a range between 0.8 and 1.2. In doing so, the Supervisory Board takes into account the individual financial and non-financial performance.

To measure the individual performance, the Supervisory Board defines individual performance aspects to evaluate the personal contribution of each member of the Board of Management. The individual performance aspects may be based on the three dimensions growth, people and risk management. They may include strategic and operational aspects as well as non-financial aspects as the Supervisory Board also sees these aspects as being important for the strategy and success of Brenntag and wishes to reward them.

The final payout amount is capped at max. 200% of the individual and contractually agreed target amount (Cap). If the overall payout factor for the financial performance criteria is already 200%, the individual performance multiplier cannot increase the annual bonus further.

If the service agreement begins or ends during a financial year, the target amount for that financial year applies on a pro rata temporis basis.

The annual bonus should be paid out within three months from approval of the consolidated financial statements by the Supervisory Board, but at the latest twelve months after the end of the financial year for which the annual bonus has been determined.

Long-term variable remuneration under the Remuneration System 2023

The long-term variable remuneration is granted in the form of virtual shares (performance share units). The number of virtual shares may increase or decrease depending on the long-term performance of Brenntag measured using specified performance criteria over a four-year performance period.

The number of virtual shares to be granted initially is calculated by dividing the individual and contractually agreed target amount by the arithmetic mean of the Brenntag share closing prices in the Xetra trading system during the last three months before the start of the performance period. If the service agreement begins or ends during a financial year, the target amount for that financial year is calculated on a pro rata temporis basis.

4.05 Structure of the performance share plan – Remuneration System 2023

The number of virtual shares finally awarded to the member of the Board of Management is linked to two financial performance criteria and to ESG targets by way of an ESG multiplier. The two financial performance criteria are Brenntag's total shareholder return (TSR) compared with a global peer group (weighting: 70%) and the return on capital employed (ROCE) (weighting: 30%). The sum of the respective weighted share awards for each performance criterion is then multiplied by the achievement of certain ESG targets by means of an ESG multiplier, which can range from 0.8 to 1.2. The resulting overall share award is then multiplied by the number of virtual shares initially granted, resulting in the number of virtual shares finally awarded to the member of the Board of Management at the end of the four-year performance period. The number of virtual shares finally awarded is limited to 200%.

The respective payout amount depends on the absolute change in the Brenntag share price over the four-year performance period and is determined by multiplying the number of virtual shares finally awarded by the arithmetic mean of the Brenntag share closing prices in the Xetra trading system during the last three months prior to the end of the performance period plus dividend payments during the performance period. The payout amount is capped at maximum 250% of the individual and contractually set target amount (Cap).

The payout amount is to be paid within three months from approval of the consolidated financial statements by the Supervisory Board, but at the latest twelve months after the end of the financial year in which the performance period ends.

The TSR is a key performance indicator for our shareholders. The TSR reflects the change in the share price and dividend distributions, i.e. the return of the Brenntag share. In addition to changes in share price and dividends, other capital measures are also considered. When comparing the TSR of the Brenntag share with the shareholder return of other companies, the advantages of an investment in the Brenntag share are measured compared with alternative investments in shares of other companies. It is of central importance for the long-term stability of the company that shareholders receive an attractive return on their investment in Brenntag shares.

The relative TSR is defined as the ranking of Brenntag's TSR performance compared with the TSR performance of a group of global peer companies. When selecting global peer companies, the Supervisory Board considers the chemical distribution market as well as the distribution business model and the underlying market of Brenntag. The global peer group can be adjusted by the Supervisory Board, if necessary, to maintain a meaningful composition of the peer group (e.g. mergers, acquisitions and delisting of companies in the peer group).

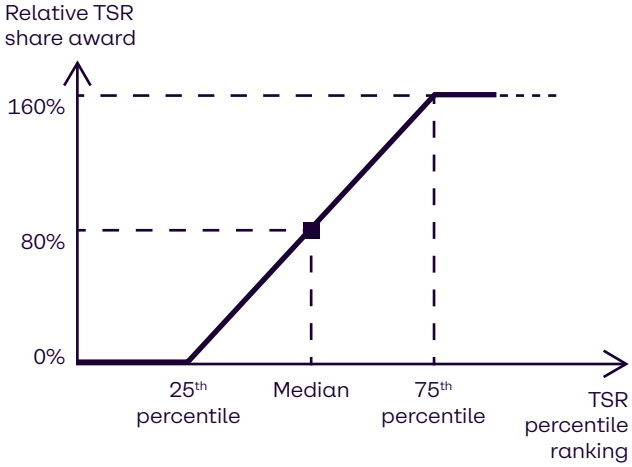

Univar Inc. was delisted on August 1, 2023 and the company is therefore no longer part of the peer group. The global peer group therefore now consists of the following companies:

Chemical distributors	Other distributors	Chemical producers
Azelis Group N.V.	Bossard Holding AG	Ashland Global Holdings Inc.
DKSH Holding AG	Bunzl plc	Croda International plc
IMCD N.V.	Rexel S.A.	Evonik Industries AG
	RS Group plc	DSM-Firmenich AG[1)]
	WW Grainger Inc.	LANXESS AG
		Solvay S.A.

4.06 Peer group of global competitors – Remuneration System 2023

[1)] Koninklijke DSM (DSM) was delisted on May 31, 2023 owing to its merger with Firmenich; it was therefore removed from the peer group. The shares of the merged company, DSM-Firmenich AG, were listed on the stock exchange on April 18, 2023. Koninklijke DSM N.V. is not part of the peer group for the LTIP tranche 2023-2026. DSM-Firmenich AG has been included in the peer group as of January 1, 2024.

The share award for the relative TSR is determined based on the percentile ranking method. If Brenntag's TSR percentile ranking is equal to the median (50th percentile), the share award for the relative TSR is 80%. If Brenntag's TSR percentile ranking is equal to or below the 25th percentile, the share award for the relative TSR is 0%. If Brenntag's TSR percentile ranking is equal to or exceeds the 75th percentile, the share award for the relative TSR is 160%. The range for relative TSR is defined as 0-160%, in contrast to the range for ROCE, to create a balanced risk-reward profile around the median through symmetry. Values in-between are determined by linear interpolation. This results in a share award curve as follows:

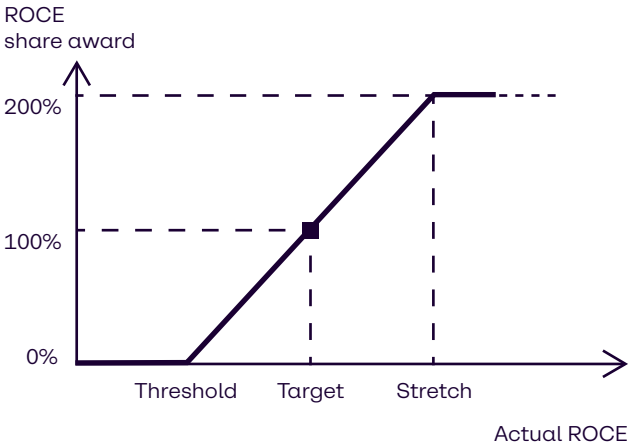

4.07 Relative TSR share award curve

In the Brenntag Group, return on capital is measured using return on capital employed (ROCE) that is defined as:

$$\text{ROCE} = \frac{\text{Operating EBITA}}{\text{(average carrying amount of equity + average carrying amount of financial and lease liabilities - average carrying amount of cash and cash equivalents)}}$$

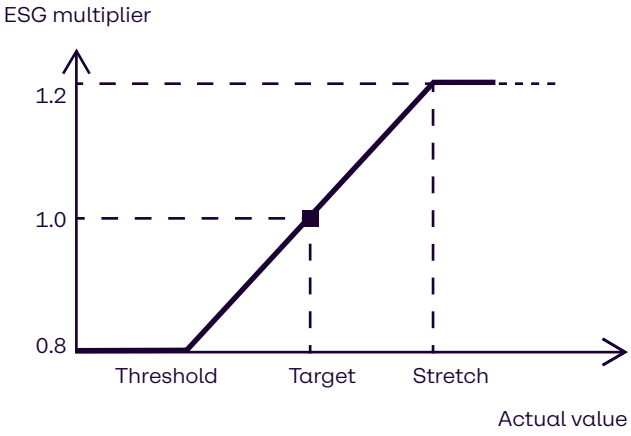

The average carrying amounts in the denominator are defined for a particular year as the arithmetic average of the amounts at each of the following five dates: the beginning of the year, the end of each of the first, second and third quarters, and the end of the year.

The Supervisory Board sets a threshold, target and stretch value for ROCE in the final year of the four-year performance period. If the defined target value for ROCE is achieved, this results in a share award of 100%. If the actual value for ROCE is equal to or below the threshold, this results in a share award of 0%. If the actual value for ROCE is equal to or above the stretch, this results in a maximum share award of 200%. If the actual values are between the respective target and threshold values or between the respective target and stretch values, the share award is determined by linear interpolation. The following is an example of a share award curve defined for ROCE:

4.08 ROCE share award curve

To ensure the sustainable and long-term success of Brenntag and its commitment to sustainable solutions in its own sector and the industries served, the Supervisory Board is required to define ambitious ESG targets based on Brenntag's sustainability strategy. Based on the relevance of the strategic ESG key areas which are subject to continuous evolution, the Supervisory Board selects up to three performance criteria and defines target values which are to be achieved at the end of the performance period of the respective tranche and translate into a multiplier between 0.8 and 1.2 for each ESG target. The multipliers for each ESG target are weighted equally resulting in an overall ESG multiplier between 0.8 and 1.2. An example of an ESG multiplier curve, defined for each ESG target, is as follows:

4.09 ESG multiplier curve per ESG target

The specific ESG targets for the 2023–2026, 2024–2027 and 2025–2028 tranches of the performance share plan are as follows:

- Reduction of greenhouse gas emissions (Scope 1 and Scope 2)
- Further increase in occupational safety (reduction in the Total Recordable Injury Frequency Rate (TRIR))
- Increase in the proportion of female employees at various management levels

For the 2023–2026, 2024–2027 and 2025–2028 tranches, the target values for the TRIR and the increase in the proportion of female employees are aligned with the ESG targets for a syndicated credit facility. For the 2023–2026 and 2024–2027 tranches, the target values for the reduction in greenhouse gas emissions (Scope 1 and Scope 2) are likewise aligned with the ESG targets for a syndicated credit facility. For the 2025–2028 tranche, the target value for the reduction in greenhouse gas emissions (Scope 1 and Scope 2) is derived from the Group-wide reduction targets, which were successfully validated by the Science Based Targets initiative (SBTi) in January 2025.

The ESG targets of the performance share plan can be aligned with the topics of climate change, health and safety, and diversity, in line with the double materiality assessment as outlined by the CSRD. Further information, including details on strategies and actions, can be found in the Group sustainability statement.

A forecast for the tranche of long-term variable remuneration to be granted in 2026 is not provided as this is currently under review.

Malus and clawback

The company is contractually entitled to withhold variable remuneration ("malus") in whole or in part if the members of the Board of Management breach their obligations under Section 93 of the German Stock Corporation Act or in case of breaches of duty which would justify a termination for cause (Section 626 German Civil Code (BGB)). Equally, the company is contractually entitled to correct the amount of variable remuneration determined if that determination was based on incorrect data. In addition, the company is contractually entitled to demand partial or complete repayment ("clawback") of variable remuneration if members of the Board of Management breach their obligations under Section 93 of the German Stock Corporation Act, or in case of breaches of duty which would justify a termination for cause (Section 626 German Civil Code), or payout of the variable remuneration was made on the basis of incorrect data. Malus and clawback events generally only have an effect on variable remuneration components for those financial years during which they actually occurred. Variable remuneration can be clawed back for a period of three years following payout.

In financial year 2025, no variable remuneration was retained or clawed back.

Caps and maximum remuneration

The Board of Management members' total remuneration is limited by a cap applying to each variable remuneration component and by maximum remuneration. Exceptional performance is required to achieve the cap of each variable remuneration component.

If the upper threshold for the financial key performance indicators of the annual bonus is achieved, a maximum preliminary payout amount of 200% of the target amount is reached. Even the application of the individual performance multiplier cannot increase the payout amount above this cap of 200%.

Under the performance share plan, the number of final virtual shares achievable is limited to 200% of the number of initial virtual shares granted. This maximum number of shares can only be reached if the Brenntag share performs better than 75% of the companies in the global peer group and if the upper thresholds for both ROCE and the ESG multiplier are reached. In addition, the payout amount depends on the performance of the Brenntag share price and dividend payments. The total payout under the performance share plan is limited to 250% of the initial target amount.

The maximum total remuneration comprises the annual base salary, maximum annual bonus remuneration, maximum performance share plan remuneration, the pension allowance and benefits in kind. The maximum total remuneration has been set at EUR 7,500,000 for Jens Birgersson, at EUR 4,350,000 for Thomas Reisten, at EUR 6,800,000 for Dr. Christian Kohlpaintner, at EUR 3,300,000 for Dr. Kristin Neumann and Ewout van Jarwaarde, and at EUR 3,900,000 for Michael Friede. If the service agreement begins or ends during a financial year, the remuneration cap for that financial year is adjusted on a pro rata temporis basis.

Share Ownership Guideline

In order to bring the interests of the Board of Management and shareholders more closely into line and to strengthen the Board of Management members' ownership in the company, there is an obligation to accumulate and hold Brenntag shares (Share Ownership Guideline). The chair of the Board of Management is obliged to accumulate and continue to hold shares to the value of 200% of his/her annual base salary for two years after the end of his/her service. Thomas Reisten, Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde are obliged to accumulate and continue to hold shares to the value of 100% of their annual base salaries for two years after the end of their service. They must accumulate the shares within four years at the latest. In each of these four years, shares equivalent to 25% of the holding obligation must be acquired. Compliance with the obligation to hold shares is checked once a year, as at December 31.

The last check as at December 31, 2024 showed that all Board of Management members subject to the obligation had met their obligation to hold shares in full. The next check as at December 31, 2025 is expected to take place in March 2026.

Board of Management Remuneration System 2020

The Board of Management Remuneration System 2020 applied to the 2022–2025 tranche of the performance share plan granted under this system, the performance period of which ended in the reporting period.

Long-term variable remuneration under the Remuneration System 2020

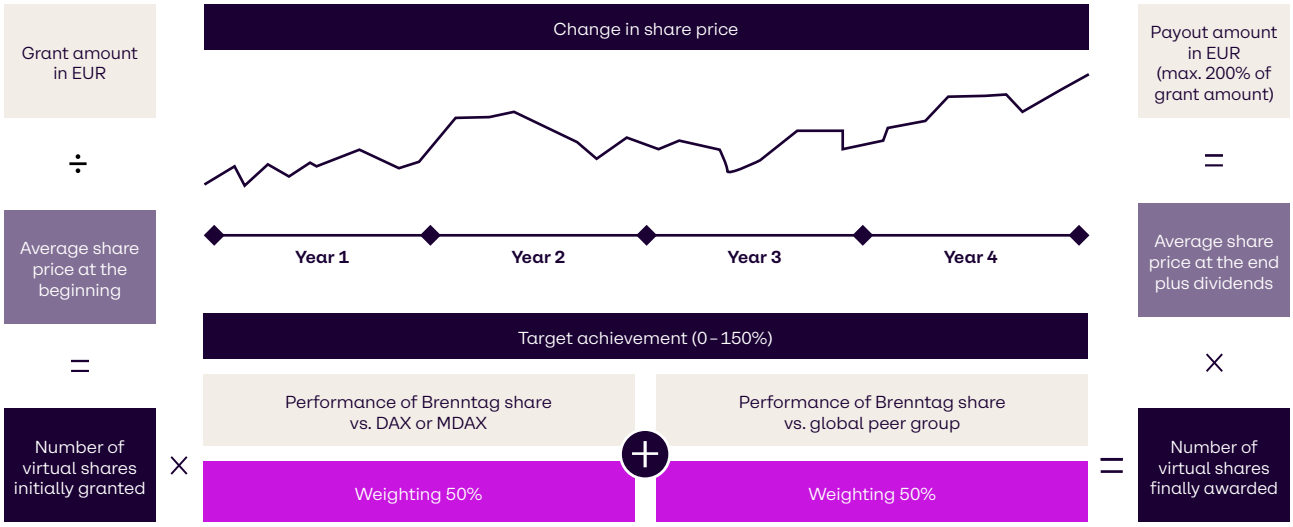

The long-term variable remuneration is in the form of virtual shares (performance share units). The payout depends on the relative performance of the Brenntag share compared with two peer groups and the absolute change in the Brenntag share price over a four-year performance period.

The annual virtual shares are contingently granted on January 1 of each financial year. The number of shares initially granted is calculated by dividing the individual and contractually agreed grant amount by the arithmetic mean of the Brenntag share closing prices in the Xetra trading system during the last three months before the start of the performance period. If the service agreement begins or ends during a financial year, the amount for that financial year is granted on a pro rata temporis basis.

The number of virtual shares that a Board of Management member is finally granted at the end of the four-year performance period depends on two performance criteria that are set by the Supervisory Board and each weighted at 50%: the outperformance of the total shareholder return (TSR) of the Brenntag share compared with

- the TSR performance of the DAX or MDAX and
- the average TSR of a peer group of global competitors.

Due to the inclusion of Brenntag in the DAX, the national benchmark index was changed from the MDAX to the DAX in 2022. Furthermore, Azelis Group NV was added to the peer group of global competitors in 2022.

4.10 Structure of the performance share plan – Remuneration System 2020

The benchmark parameters for the performance criteria of the individual tranches are as follows:

Tranche	National benchmark index	Peer group of global competitors
2020	MDAX	Companies in Figure below excluding Azelis Group NV
2021		
2022	DAX	Companies in Figure below including Azelis Group NV
2023		

4.11 Overview of the benchmark parameters for each tranche - Remuneration System 2020

Univar Inc. was delisted on August 1, 2023 and the company is therefore no longer part of the peer group. The global peer group therefore now consists of the following companies:

Aalberts N.V.	Air Liquide S.A.	Ashland Global Holdings Inc.	Azelis Group NV
Bunzl plc	DKSH Holding Ltd.	RS Group plc[1)]	Evonik Industries AG
Ferguson plc	IMCD N.V.	Linde plc	McKesson Corporation
Rexel S.A.	Travis Perkins plc	W.W. Grainger, Inc.	

4.12 Peer group of global competitors – Remuneration System 2020

[1)] Note: RS Group plc. formerly traded under the name Electrocomponents plc.

Target achievement of each performance criterion is calculated by subtracting the performance of the DAX or MDAX or the average TSR of the global peer group from the TSR of the Brenntag share. If the performance of the DAX or MDAX or the average TSR of the global peer group equals the TSR of the Brenntag share, target achievement is 100%. If the TSR of the Brenntag share outperforms the DAX or MDAX or the average TSR of the global peer group by 25% or more percentage points, target achievement is 150%. If the TSR of the Brenntag share underperforms the DAX or MDAX or the average TSR of the global peer group by 25% or more percentage points, target achievement is 0%. Values in-between are determined by linear interpolation. Overall target achievement is calculated by multiplying the target achievement figures of the two performance criteria by their respective weightings and then adding together these two weighted target achievement figures.

The number of virtual shares that a Board of Management member is finally granted at the end of the four-year performance period is calculated by multiplying the number of virtual shares initially granted by the overall target achievement.

The payout amount is determined by multiplying the number of virtual shares finally granted by the arithmetic mean of the Brenntag share closing prices in the Xetra trading system during the last three months prior to the end of the performance period plus dividend payments during the performance period. The payout amount is capped at max. 200% of the individual and contractually set grant amount (Cap).

The payout amount is to be paid within three months from approval of the consolidated financial statements by the Supervisory Board, but at the latest twelve months after the end of the financial year in which the performance period ends.

Early payout of the tranches of the performance share plan is not possible under the Remuneration System 2020.

Malus and clawback

All variable remuneration components of a Board of Management member are only paid out after the end of the regular plan period. The Supervisory Board is contractually entitled to retain the variable remuneration (malus) in whole or in part if a Board of Management member violates their obligations under Section 93 of the German Stock Corporation Act. In addition, the Supervisory Board is contractually entitled to reclaim parts of the variable remuneration (clawback) if a Board of Management member breaches their obligations under Section 93 of the German Stock Corporation Act, payout of the variable remuneration was made on the basis of incorrect data or the company's EBITDA decreases by at least 25% within two years and during the Board of Management member's service compared with the EBITDA for which the variable remuneration was paid. Clawback of variable remuneration is possible up to an amount of 25% of the total remuneration for the respective financial year.

In financial year 2025 no variable remuneration was retained or clawed back.

Further remuneration and contractual provisions

The following describes further remuneration and contractual provisions that are largely applicable under both remuneration systems.

For building up pension entitlements, Jens Birgersson receives from the company an annual amount of EUR 330,000, Thomas Reisten receives an annual amount of EUR 160,000 and Dr. Christian Kohlpaintner receives an annual amount of EUR 300,000; they may decide at their own discretion how to use this money. The annual amount is paid out once a year to Jens Birgersson and Thomas Reisten and in twelve equal instalments at the end of each month to Dr. Christian Kohlpaintner. If the service agreement begins or ends during a financial year, the annual amount will be granted on a pro rata temporis basis for that financial year.

For building up pension entitlements, the other members of the Board of Management receive an annual amount of 13.5% (rounded to the next full EUR 1,000) of their annual base salary and the short-term variable remuneration (on 100% target achievement, i.e. irrespective of the actual targets achieved). Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde are paid the relevant amount for building up pension entitlements every year and may decide at their own discretion how to use this money.

Apart from that, no expenses or provisions for pension commitments were incurred or recognized for the members of the Board of Management serving in financial year 2025, and they had been given no pension commitment.

Apart from the amounts explained above, which are made available to build up pension entitlements, no other arrangements for retirement and early retirement have been agreed.

In addition to the above-mentioned remuneration components, the Board of Management members receive benefits in kind and other benefits, such as a mobility allowance, and benefits for health care and long-term care insurance.

The benefits for health care and long-term care insurance are limited to max. 50% of the premium they pay into their health care and long-term care insurance. Should Ewout van Jarwaarde be subject to the statutory social security system in the Netherlands, Brenntag will pay the corresponding employer contributions to the Dutch social security system up to an amount of EUR 20,000 per year.

Furthermore, a group accident insurance has been taken out. In addition, the company has taken out Directors & Officers Insurance (damage liability insurance) for the Board of Management members. This provides for a deductible of 10% of the damages claimed in each case, but in each year limited to 150% of the annual base salary.

In the event of temporary disability due to illness, accident, or any other cause not due to the fault of a Board of Management member, said member is entitled to continued payment of the full annual base salary for a period of no more than nine months. For the first three months of such incapacity, full entitlement to the annual bonus and the target or grant amount of the long-term variable remuneration is also retained. In the event of the death of a Board of Management member, the base salary is paid to their surviving dependents for the month of their death and the six months following their death or until the date on which the service agreement would have been terminated without their death, whichever event occurs first.

Contract termination provisions

The service agreements of the Board of Management members end automatically on specified dates without any notice of termination being required. The employment of Board of Management members may only be terminated prematurely for good cause or by mutual agreement. If employment is terminated prematurely, the service agreement limits any severance pay to the value of twice the total annual remuneration, but no more than the amount of remuneration that would be paid until the end of the term of the service agreement.

A post-contractual non-compete obligation has been agreed with Jens Birgersson, Thomas Reisten, Dr. Christian Kohlpaintner, Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde. The post-contractual non-compete obligation applies to Jens Birgersson for 12 months and to the other members of the Board of Management named above for 24 months after termination of their service agreement. During this period, there is an entitlement to continued payment amounting to 75% of their annual base salary. Any earnings pursuant to Section 74c of the German Commercial Code (HGB) are deducted from this payment.

There are no separate change-of-control arrangements.

Target remuneration of Board of Management members serving in financial year 2025

In order to ensure transparent reporting of the Board of Management remuneration, the following table first shows the contractually agreed target amounts for the individual remuneration components for each serving Board of Management member plus the benefits in kind. As Jens Birgersson and Thomas Reisten were appointed to the Board of Management during 2025 and the service agreements of Dr. Kristin Neumann and Michael Friede ended during the year, the target amounts indicated in that year are pro rata temporis amounts.

		Jens Birgersson	Thomas Reisten	Dr. Christian Kohlpaintner

4.13 Target remuneration of the Board of Management members serving in financial year 2025

[1] The system for determining the annual bonus 2025 does not apply to Jens Birgersson. An explanation of this can be found at the beginning of the section "Board of Management Remuneration System 2023".

Performance criteria for the variable remuneration

The following table shows the respective targets and the results actually achieved for the annual bonus 2025. The respective target achievement is calculated from the two figures.

The results of organic operating EBITA are calculated on the basis of constant exchange rates. Specifically, the exchange rates used in the 2025 budget are applied, which also form the basis for setting the target values.

The system for determining the annual bonus 2025 does not apply to Jens Birgersson. An explanation of this can be found at the beginning of the section "Board of Management Remuneration System 2023".

	Thomas Reisten, Dr. Christian Kohlpaintner, Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde				
2025	Threshold	Target	Cap	Result	Target achievement

Earnings per share (in EUR)					
Brenntag Group	3.64	4.04	4.44	1.83	–

4.14 Performance criteria for the annual bonus 2025 – Remuneration System 2023

The Supervisory Board and the Board of Management members have agreed individual performance aspects to measure individual performance. Each performance aspect is linked to specific sub-aspects which are used to assess achievement of the respective performance aspect. This approach enables a holistic view to be taken when determining the individual performance multiplier for 2025. These individual performance aspects include the following:

- **Health, Safety and Environment:** Develop and implement measures to strengthen the safety culture and achieve measurable improvements in occupational health and safety and environmental protection, including process safety. The assessment is based on measurable progress in the implementation of global safety and sustainability programs.

- **Operational performance – Gross profit, margins and portfolio:** Improve the operational performance of both divisions by implementing budget targets, optimizing the product and service portfolio, improving margins, and continuing strategic portfolio adjustments and efficiency measures. Operational performance was assessed on the basis of quantitative key financial indicators and progress in portfolio optimization. This is based on objective planned-actual comparisons.

- **Operational performance – Cost efficiency:** Achieve budgeted savings and develop further efficiency programs in the areas of transport, warehousing, sales, and support functions to sustainably reduce the operating cost base. The assessment is based on analytically tracked efficiency gains and cost improvements compared with budget targets.

- **Risk management, Compliance and ESG:** Further improve integrated risk and compliance management and the ESG strategy with a focus on transparency, compliance with regulations, reduction of CO_2 emissions, and sustainable corporate development. The assessment is based on measurable targets such as audit findings, training rates, and sustainability metrics.

- **M&A, CapEx and cash flow:** Integrate acquisitions, optimize investment and divestment criteria, and ensure disciplined capital expenditure and stable cash flow development within the framework of the corporate strategy. The assessment takes into account compliance with investment and integration targets as part of the long-term financial strategy. It is based on quantitative indicators for capital utilization and integration efficiency.

- **Digitalization und DIDEX refocus:** Continue and refocus the DIDEX digitalization program on system harmonization, process standardization, and efficiency improvements in the fields of sales, logistics, and ERP systems. The assessment is based on the analytical progress of the digitalization programs in terms of time, cost, and quality targets.

- **Leadership, succession and culture:** Ensure leadership and succession planning at the highest management level, promote talent, and strengthen corporate culture through transparent communication, global employee engagement, and targeted development programs. The assessment is based on defined milestones in succession planning and in-house management development programs.

In order to protect confidential company information and safeguard against competitive disadvantages, the sub-aspects and assessment criteria for individual performance aspects are not disclosed in detail.

The link to ESG in the individual performance multiplier is established directly through the relevant performance aspects. There is also the requirement that special weight is given to the avoidance of particularly serious HSE (health, safety, environment) incidents when assessing individual performance.

For Dr. Kristin Neumann, the only individual performance aspect, by way of exception, was ensuring a smooth handover to Thomas Reisten.

Also, from a holistic perspective, the Supervisory Board finds that the expectations placed on the Board of Management members regarding progress in the individual performance aspects have generally been met. The individual performance multiplier was set by the Supervisory Board at 1.00 for Thomas Reisten, 0.97 for Dr. Christian Kohlpaintner, 1.20 for Dr. Kristin Neumann, 0.97 for Michael Friede and 0.97 for Ewout van Jarwaarde.

The annual bonuses for 2025 are calculated on the basis of the performance criteria previously described and the individual performance multipliers as follows:

2025	Thomas Reisten	Dr. Christian Kohlpaintner	Dr. Kristin Neumann	Michael Friede	Ewout van Jarwaarde
Target amount	**EUR 583k**	**EUR 1,000k**	**EUR 125k**	**EUR 504k**	**EUR 500k**

4.15 Calculation of the annual bonus for 2025 – Remuneration System 2023

The performance criteria for the 2022-2025 tranche of the performance share plan under the Board of Management Remuneration System 2020 were set at the end of 2021. Dr. Christian Kohlpaintner, Dr. Kristin Neumann and Ewout van Jarwaarde, along with former Board of Management members Henri Nejade and Steven Terwindt, are the recipients of this tranche. The performance period ran from January 1, 2022 to December 31, 2025 and the payout amounts are determined on the basis of the performance criteria previously described as follows:

Tranche 2022-2025	Dr. Christian Kohlpaintner	Dr. Kristin Neumann	Ewout van Jarwaarde	Henri Nejade	Steven Terwindt
Grant amount	**EUR 1,200k**	**EUR 500k**	**EUR 550k**	**EUR 600k**	**EUR 600k**
Average share price at the beginning of the performance period	EUR 79.62	EUR 79.62	EUR 79.62	EUR 79.62	EUR 79.62
Number of virtual shares initially granted	**15,072**	**6,280**	**6,908**	**7,536**	**7,536**
Brenntag TSR performance	-30.5%	-30.5%	-30.5%	-30.5%	-30.5%
Average TSR performance of the global peer group (weighting 50%)	19.9%	19.9%	19.9%	19.9%	19.9%
TSR outperformance vs. global peer group	-50.4%	-50.4%	-50.4%	-50.4%	-50.4%
Target achievement	–	–	–	–	–
DAX TSR performance (weighting 50%)	53.6%	53.6%	53.6%	53.6%	53.6%
TSR outperformance vs. DAX	-84.1%	-84.1%	-84.1%	-84.1%	-84.1%
Target achievement	–	–	–	–	–
Overall target achievement	–	–	–	–	–
Number of virtual shares finally awarded	**-**	**-**	**-**	**-**	**-**
Average share price at the end of the performance period plus dividend	EUR 56.90	EUR 56.90	EUR 56.90	EUR 56.90	EUR 56.90
Payout amount (max. 200% of grant amount)	**-**	**-**	**-**	**-**	**-**

4.16 Calculation of the 2022-2025 tranche of the performance share plan – Remuneration System 2020

Information on remuneration awarded and due to Board of Management members serving in financial year 2025 and former members in accordance with Section 162 AktG

In the Remuneration Report 2025, the second interpretation option acceptable to the Institute of Public Auditors in Germany is applied and remuneration is therefore deemed to have been "awarded and due in the financial year" if the underlying activity has been performed in full by the end of the financial year or the vesting period has been completed in full and the vesting requirements have been met.

Information on remuneration awarded and due to Board of Management members serving in financial year 2025 in accordance with Section 162 AktG

Dr. Christian Kohlpaintner stepped down from the Board of Management by mutual agreement on August 31, 2025, but his service agreement remained in force until December 31, 2025 in order to support the onboarding of Jens Birgersson and ensure an orderly handover of his duties. Jens Birgersson took over as CEO of the Brenntag Group on September 1, 2025.

Dr. Kristin Neumann stepped down on March 31, 2025 and her service agreement ended on the same day. The post-contractual non-compete obligation under the Remuneration System 2023 was waived. She received compensation, which, taking into account the six-month notice period, was paid only until June 17, 2025. Thomas Reisten took over as Chief Financial Officer on April 1, 2025. His service agreement began on March 1, 2025.

On September 8, 2025, Ewout van Jarwaarde stepped down from the Board of Management by mutual agreement. His service agreement will continue until March 31, 2026 to ensure the orderly handover of his duties and to handle important queries from members of the Board of Management and interactions with business partners.

On November 30, 2025, Michael Friede stepped down and his service agreement, which was due to run until March 31, 2026, was terminated on the same date.

By mutual agreement, the post-contractual non-compete obligations for Dr. Christian Kohlpaintner, Michael Friede and Ewout van Jarwaarde were waived, meaning that no compensation will be paid after the respective termination dates of their service agreements.

Dr. Kristin Neumann and Michael Friede received their base salary and pension allowance on a pro rata temporis basis, and their annual bonuses for 2025 were also calculated on a pro rata basis. The entitlements under the current tranches of the performance share plan for Dr. Christian Kohlpaintner, Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde will be paid out after the end of the respective performance period in accordance with the originally planned conditions (for details on the 2022–2025 tranche, see the section “Performance criteria for the variable remuneration”).

The total remuneration for the individual Board of Management members serving in financial year 2025 is as follows:

		Jens Birgersson		Dr. Christian Kohlpaintner		Thomas Reisten

4.17 Remuneration awarded and due to Board of Management members serving in financial year 2025 in accordance with Section 162 AktG

[1] Includes a contractually agreed sign-on bonus in the amount of EUR 433k, which is due for payment in 2026. A corresponding explanation is provided at the beginning of the section "Board of Management Remuneration System 2023".
[2] The annual base salary, pension allowance and benefits in kind are allocated on a pro rata temporis basis to the remuneration of former Board of Management members from September 1, 2025.
[3] The annual base salary, pension allowance and benefits in kind are allocated on a pro rata temporis basis to the remuneration of former Board of Management members from September 9, 2025.

Information on remuneration awarded and due to former Board of Management members in accordance with Section 162 of the German Stock Corporation Act (AktG)

As a former member of the Board of Management, Dr. Christian Kohlpaintner received a 100% non-performance-based base salary of EUR 469k from September 1, 2025.

As a former member of the Board of Management, Ewout van Jarwaarde received 100% non-performance-based remuneration of EUR 2,814k from September 9, 2025, consisting of a base salary of EUR 220k, a severance payment for early termination of his service agreement amounting to EUR 2,496k and the 2026 annual bonus amounting to EUR 98k. In accordance with the terms of his Board of Management service agreement, the 2026 annual bonus is calculated as the arithmetic mean of all annual bonus payments which he received during his entire term of office. The 2026 annual bonus is due for payment in 2027.

Dr. Kristin Neumann received post-contractual and 100% non-performance-based non-compete compensation of EUR 84k for the period from April 1, 2025 to June 17, 2025, as agreed in her service agreement.

In financial year 2025, EUR 315k was paid as part of a 100% non-performance-based pension commitment to a former member of the Board of Management who retired before 2014.

Under the Remuneration System 2020, entitlements under the performance share plan will be paid to Henri Nejade and Steven Terwindt upon completion of the performance period for the 2022–2025 tranche. Details regarding the 2022–2025 tranche are provided in the section "Performance criteria for the variable remuneration." Since December 2025, Henri Nejade has also been receiving pension payments.

Apart from these amounts, no remuneration was awarded or due to former Board of Management members in financial year 2025.

The following table shows the remuneration awarded and due to former Board of Management members:

		Henri Nejade		Steven Terwindt	
		in EUR k	in %	in EUR k	in %
Annual base salary	**2025**	**–**	**–**	**–**	**–**

4.18 Remuneration awarded and due to former Board of Management members in accordance with Section 162 AktG

Information on shares granted in the financial year

Jens Birgersson, Thomas Reisten, Dr. Christian Kohlpaintner, Dr. Kristin Neumann, Michael Friede and Ewout van Jarwaarde have been contingently granted virtual Brenntag shares, so-called performance share units, as part of their long-term variable remuneration under both the Remuneration System 2020 and the Remuneration System 2023.

The performance share units are paid out after the end of the respective four-year performance period. The specific performance criteria previously defined for the relevant Board of Management remuneration system are taken into account.

4.19 Performance share units initially contingently granted

[1] The relevant Brenntag share price was EUR 79.62 at the beginning of the performance period and EUR 49.25 at the end of the performance period.
[2] Price of the Brenntag share applicable at the beginning of the performance period: EUR 61.54
[3] Price of the Brenntag share applicable at the beginning of the performance period: EUR 74.93
[4] Price of the Brenntag share applicable at the beginning of the performance period: EUR 61.35

Compliance with maximum remuneration

In order to comply with the maximum remuneration requirement, all remuneration components hitherto awarded and due for a financial year are listed and allocated to the financial years in which they were granted. These amounts are added up and compared with the maximum remuneration to be applied for that financial year.

Ultimately, it was determined that the maximum remuneration for each Board of Management member was not exceeded in 2022.

A final assessment for the years 2023, 2024 and 2025 can only be made once all remuneration components have been awarded or are due. In particular, entitlements under long-term variable remuneration cannot be determined until after the end of the respective performance periods.

The following table gives a detailed breakdown of how the maximum remuneration requirement for financial year 2022 was observed:

in EUR k	Dr. Christian Kohlpaintner	Dr. Kristin Neumann	Ewout van Jarwaarde	Henri Nejade	Steven Terwindt
Annual base salary	1,000	438	475	525	525
Pension allowance	300	116	125	–	139
Service cost	–	–	–	293	–

Short-term variable remuneration	1,800	833	900	1,000	1,000
Long-term variable remuneration 2022-2025 tranche	–	–	–	–	–
Total remuneration realized in accordance with Sec. 87a, para. 1, sentence 2, no. 1 AktG	**3,138**	**1,417**	**1,536**	**2,272**	**1,708**
Maximum remuneration agreed	**5,650**	**2,500[1]**	**2,700**	**3,400**	**3,000**

4.20 Compliance with the maximum remuneration requirement in 2022 – Remuneration System 2020

[1] On a pro rata temporis basis for the period from March 1 to December 31, 2022; full-year equivalent: EUR 3,000,000.

Remuneration of the Supervisory Board

The remuneration system for the Supervisory Board was approved by 95.32% of the votes cast at the Annual General Meeting of Brenntag SE on June 15, 2023.

The provisions of the German Stock Corporation Act and the recommendations of the German Corporate Governance Code on remuneration for members of the Supervisory Board provide the regulatory framework for the remuneration system. The remuneration of the members of the Supervisory Board is purely fixed remuneration:

Fixed remuneration of the members of the Supervisory Board

Chair of the Supervisory Board	Deputy Chair of the Supervisory Board	Member of the Supervisory Board
EUR 325,000	**EUR 162,500**	**EUR 130,000**

Remuneration for committee memberships of the members of the Supervisory Board

Chair	Member
Nomination and Remuneration Committee Audit and Compliance Committee Transformation and ESG Committee and any additional committee that may be established	Nomination and Remuneration Committee Audit and Compliance Committee Transformation and ESG Committee and any additional committee that may be established
each EUR 125,000	**each EUR 50,000**

Share ownership guidelines for the members of the Supervisory Board

Personal investment in shares of Brenntag SE (20% of gross fixed remuneration per year) with holding obligation for the duration of an appointment period.

4.21 Remuneration system for the members of the Supervisory Board

The remuneration levels take into account the functions and the respective responsibilities of the members of the Supervisory Board and are in an appropriate relationship to the situation of Brenntag. The remuneration of supervisory boards and committees in comparable national and international companies of the same industry is also considered.

The expertise of Supervisory Board members needed for constructive work in different committees and their time commitment are very similar for the committees. Therefore, the remuneration paid for committee memberships is standardized.

In line with international market practice, the members of the Supervisory Board must invest part of their fixed remuneration in Brenntag shares in order to align with the interests of shareholders.

The following table shows the amounts due in 2025 to Supervisory Board members serving in financial year 2025 and former members:

in EUR k		Fixed remuneration	Remuneration for committee work	Total
Richard Ridinger Chair	**2025**	**325**	**100**	**425**
	2024	325	100	425

	2024	1,008	675	1,683

4.22 Remuneration awarded and due (vesting-based interpretation) to the Supervisory Board[1)]

[1)] Note: The remuneration of the Supervisory Board members is purely fixed remuneration.

The members of the Supervisory Board serving as at December 31, 2025 are obliged to invest 20% of gross fixed remuneration for 2025 as a personal investment in shares of Brenntag SE and to hold the shares in their ownership until the end of their term of office. The investment obligation comes into effect at the end of 2025 and must be met by the end of 2026. The check for compliance with this obligation as at December 31, 2026 is expected to be performed in March 2027 and a report will be given in the Remuneration report 2027.

The last check as at December 31, 2024 showed that all members of the Supervisory Board who were required to do so had fully met their investment obligations. The next check as at December 31, 2025 is expected to take place in March 2026.

Furthermore, Directors & Officers insurance (damage liability insurance) has been taken out for the members of the Supervisory Board. Beyond this, Supervisory Board members received no further remuneration or benefits for personal services rendered, in particular advisory and mediatory services, in the reporting period. No loans or advances were granted to members of the Supervisory Board in the reporting period, nor were any guarantees or other commitments entered into in their favor.

4.23 Changes in Board of Management, Supervisory Board and employee remuneration

[1] Since Karsten Beckmann repaid an amount of EUR 14k, the remuneration awarded and due to him in 2021 was negative. The corresponding change in 2022 compared with 2021 can therefore only be stated in absolute terms.

[2] Apart from apprentices, interns and pre-retirement part-time workers, all employees of Brenntag SE and thus of the Group head office who had a valid employment contract with Brenntag SE in the respective financial year are included in the changes in average employee remuneration.

The above table shows the changes in the remuneration of the Board of Management, Supervisory Board and employees as well as the changes in the company's earnings.

Changes in remuneration and the company's earnings were shown for the first time from 2020 to 2021 and are now updated every year in the remuneration report. With serving and former Board of Management members, the total remuneration awarded and due is taken into account as described in the section "Information on remuneration awarded and due to Board of Management members serving in financial year 2025 and former members in accordance with Section 162 of the German Stock Corporation Act (AktG)". In the case of serving and former Supervisory Board members, the total remuneration awarded and due is taken into account as described in the section "Remuneration of the Supervisory Board". Apart from apprentices, interns and pre-retirement part-time workers, all employees who had a valid employment contract with Brenntag SE in the respective financial year are included in the changes in average employee remuneration.

Part-time employment and entries and departures from the company during the year are extrapolated to the full-year, full-time equivalent. Base salary and short-term and long-term variable remuneration paid in the financial year are included in the calculation for employees. Benefits in kind and company pension schemes for employees are excluded from the calculation as these remuneration components are to a large extent purely administrative and are not subject to the classic, annual adjustment mechanism. In this analysis, we focus only on the employees of Brenntag SE in order to avoid a distorted picture in the future as a result of takeovers and different remuneration dynamics in other countries.

Report of the Independent Auditor

To Brenntag SE, Essen / Germany

We have audited the accompanying remuneration report of Brenntag SE, Essen/Germany, ("the Company") for the financial year from January 1 to December 31, 2025, including the related disclosures, which has been prepared to comply with Section 162 German Stock Corporation Act (AktG).

Responsibilities of the Executive Directors and of the Supervisory Board

The executive directors and the supervisory board of Brenntag SE, Essen/Germany, are responsible for the preparation of the remuneration report, including the related disclosures, that complies with the requirements of Section 162 AktG. The executive directors and the supervisory board are also responsible for such internal control as they consider necessary to enable the preparation of a remuneration report, including the related disclosures, that is free from material misstatement, whether due to fraud (i.e., fraudulent financial reporting and misappropriation of assets) or error.

Auditor's Responsibilities

Our responsibility is to express an opinion on this remuneration report, including the related disclosures, based on our audit. We conducted our audit in compliance with German Generally Accepted Standards for Financial Statement Audits promulgated by the Institut der Wirtschaftsprüfer (IDW). These Standards require that we fulfill the professional responsibilities and that we plan and perform the audit so that we obtain reasonable assurance as to whether the remuneration report, including the related disclosures, is free from material misstatements.

An audit involves performing audit procedures in order to obtain audit evidence for the amounts stated in the remuneration report, including the related disclosures. The choice of the audit procedures is subject to the auditor's professional judgment. This includes assessing the risk of material misstatements, whether due to fraud or error, in the remuneration report, including the related disclosures. In assessing these risks, the auditor considers the system of internal control, which is relevant to preparing the remuneration report, including the related disclosures. Our objective is to plan and perform audit procedures that are appropriate in the circumstances, but not to express an audit opinion on the effectiveness of the Company's system of internal control. An audit also comprises an evaluation of the accounting policies used, of the reasonableness of accounting estimates made by the executive directors and the supervisory board as well as an evaluation of the overall presentation of the remuneration report, including the related disclosures.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinion.

Audit Opinion

In our opinion, on the basis of the knowledge obtained in the audit, the remuneration report for the financial year from January 1 to December 31, 2025, including the related disclosures, complies, in all material respects, with the accounting principles of Section 162 AktG.

Other Matter – Formal Audit of the Remuneration Report

The audit of the content of the remuneration report described in this auditor's report comprises the formal audit of the remuneration report required under Section 162 (3) AktG including the issuance of a report on this audit. Since our audit opinion on the content audit is unmodified, this audit opinion includes that the disclosures required under Section 162 (1) and (2) AktG are contained, in all material respects, in the remuneration report.

Intended Use of the Report

We issue this report as stipulated in the engagement letter agreed with the Company. The audit has been performed for the purposes of the Company and the report is solely intended to inform the Company about the result of the audit.

Liability

This report is not intended to be used by third parties as a basis for any (asset) decision. We are liable solely to Brenntag SE, Essen/Germany, and our liability is also governed by the engagement letter dated July 14/16, 2025 agreed with the Company as well as the "General Engagement Terms for Wirtschaftsprüferinnen, Wirtschaftsprüfer and Wirtschaftsprüfungsgesellschaften (German Public Auditors and Public Audit Firms)" promulgated by the Institut der Wirtschaftsprüfer in Deutschland e.V. (IDW) in the version dated January 1, 2024 (IDW-AAB). However, we do not accept or assume liability to third parties.
